On 2nd June 2022, Department of Mechanical Engineering, The Oxford College of Engineering sponsored the No Plastic Awareness Programme at BTM Lake, Bangalore. The programme focused on bringing awareness about the avoiding plastic as much as possible in environment. Participants of the event consisted of 26 students and a faculty from the department of mechanical engineering. The event began at 10:00 AM and all the students started rally to spread the awareness in the BTM Lake, Bangalore. The aim is to increase public understanding and shape community perceptions on the dangers of plastic pollution and available solutions, thereby empowering more people and organizations to take action. Community actions can include changes in individual attitudes and purchasing habits, increased sorting and recycling behaviour, responsible business processes and practices, among others.

An outreach program on “Spot Fixing” was organized by the 6th semester students of the Department of Biotechnology on the 8th of May, 2022 in association with the Youth for Parivarthan organization at Frazer Town, Shivajinagar.

Cleanliness is the act of keeping our body, mind, dress, home, surroundings and other work areas neat and clean. Cleanliness of the body is very necessary for our physical and mental health. Cleanliness of the surrounding areas and environment is very necessary for the social and intellectual health.

Volunteering to serve the community is not only beneficial to the individuals involved but it is necessary in creating better societies for all. Volunteering work in our societies basically involves sharing and friendship through which people can find out what others need so that they can work on assisting them in all ways possible. Through volunteer work, many people's lives are changed be it through words or material assistance.

There is an increasing need for cleanliness all around the country and this can be achieved only by the support of the citizens of the country. Cleanliness drive is one of the best ways to start eliminating the accumulation of wastes and inculcating the sense of responsibility in each and every citizen of the country. Being the young citizens of the country, we the students of 6th semester went to Frazer Town, Shivajinagar as volunteers of the Youth for Parivarthan organization and transformed a place that was not much pleasing to look into a beautiful place filled with art on the walls and decent looking patterns on the footpath.

#TOGETHERWECAN

An article about yesterday's spot-fix at Frazer Town in today's edition of Bangalore Mirror!

Painting the town red
A group of young students and members of the Pulakeshinagar Residents Welfare Association (PWRWA) & Frazer Town Residents Welfare Association (FTRWA) clean and beautify a black spot on Mosque Road on Sunday

#TOGETHERWECAN

An article about yesterday's spot-fix at Frazer Town in today's edition of Times of India!

Palike, activists join hands to spruce up stinking black spot

Times News Service
Bengaluru: A black spot on Mosque Road stinking of garbage, litter and other filth has been sanitised and made clean-friendly white. PWRWA cleaned the area, a group of architecture students joined in on Sunday.

Besides, it had to be done with the Youth for Peace and Education group took few hours to paint the spot. The group was contacted by PWRWA, Association and PWRWA.

"We had worked with the PWRWA for cleaning up local area adjacent to the spot in the (Monday). Some residents also joined us," Youth for Peace and Education founder Anitha Anand said.

QUICK FIX: Members beautify a spot at Frazer Town on Sunday

The painting started two weeks ago. The group initiated PWRWA's (MCA) and had to (Uttara) to the spot. The group started from the spot. The group started from the spot, which were workers to make the cleaning.

"It needed a lot of work. A (PWRWA) made at the spot. It was cleaned by (PWRWA) which people, (PWRWA) to make the spot. The group started from the spot, which were workers to make the cleaning.

An outreach program on “Government School Beautification” was organized by the 5th semester students of the Department of Biotechnology on the 6th of March, 2022 in association with the TOCE National Service Scheme unit and Youth for Parivarthan organization at Mariyappanapalya, Kengeri.

Cleanliness is the act of keeping our body, mind, dress, home, surroundings and other work areas neat and clean. Cleanliness of the body is very necessary for our physical and mental health. Cleanliness of the surrounding areas and environment is very necessary for the social and intellectual health.

Volunteering to serve the community is not only beneficial to the individuals involved but it is necessary in creating better societies for all. Volunteering work in our societies basically involves sharing and friendship through which people can find out what others need so that they can work on assisting them in all ways possible. Through volunteer work, many people's lives are changed be it through words or material assistance.

Government school beautification involves the process of painting the walls of the school as per the colour code for a government school and filling the walls with quotes that enlighten the minds of the students. Having a clean surrounding around the school is necessary for maintaining the health of the students. Therefore, being the young citizens of the country, we the students of 5th semester went to Kengeri government school as volunteers of the Youth for

Parivarthan organization and transformed a school that was not much pleasing to look into a beautiful place filled with colours on the walls.

An outreach program on "Swachh Bharat -Spot fixing and Wall painting" was organized by the 5th semester students of the Department of Biotechnology on the 26th of December, 2021 in association with the Youth for Parivarthan organization at Hosakerehalli main road, Banashankari.

Volunteering to serve the community is not only beneficial to the individuals involved but it is necessary in creating better societies for all. For instance, community members may volunteer to clean up a town near them or roads. This way, all members benefit by living in a clean environment which is free from illnesses. By cleaning the compounds surrounding them, society members help promote their health.

Volunteering work in our societies basically involves sharing and friendship through which people can find out what others need so that they can work on assisting them in all ways possible. Through volunteer work, many people's lives are changed be it through words or material assistance.

There is an increasing need for cleanliness all around the country and this can be achieved only by the support of the citizens of the country. Cleanliness drive is one of the best ways to start eliminating the accumulation of wastes and inculcating the sense of responsibility in each and every citizen of the country. Being the young citizens of the country, we the students of 5th semester went to Hosakerehalli main road as volunteers of the Youth for Parivarthan organization and transformed a place that was not much pleasing to look into a beautiful place filled with art on the walls and decent looking patterns on the footpath.

E-waste is electronic products that are unwanted, not working, and nearing or at the end of their "useful life." E-waste (electronic waste) includes anything with plugs, cords and electronic components. Common sources of e-waste include televisions, computers, mobile phones and any type of homeappliance, from air conditioners to children's toys. E-waste is particularly dangerous due to toxic chemicals that naturally leach from the metals inside when buried. The ongoing challenge of how best to dispose of used and unwanted electronics isn't a new one and dates back at least to the 1970s. But a lot has changed since then, particularly the number of electronics being discarded today.

We can reduce E-waste by:

1. Postpone upgrading for as long as you can
2. Find opportunities for reuse
3. Try returning the item to the manufacturer
4. Take them to a dedicated e-waste recycling facility

Next, we spoke about the ways to reduce E-Waste.

We researched about 4 technologies that can be implemented. They are:

1. Plasma Technology:

Plasma technology is an effective solution to treat the most toxic wastes like organohalogen wastes, contaminated hospital wastes, fly ashes, radioactive wastes, and e-wastes.

2. Acid Leaching Process:

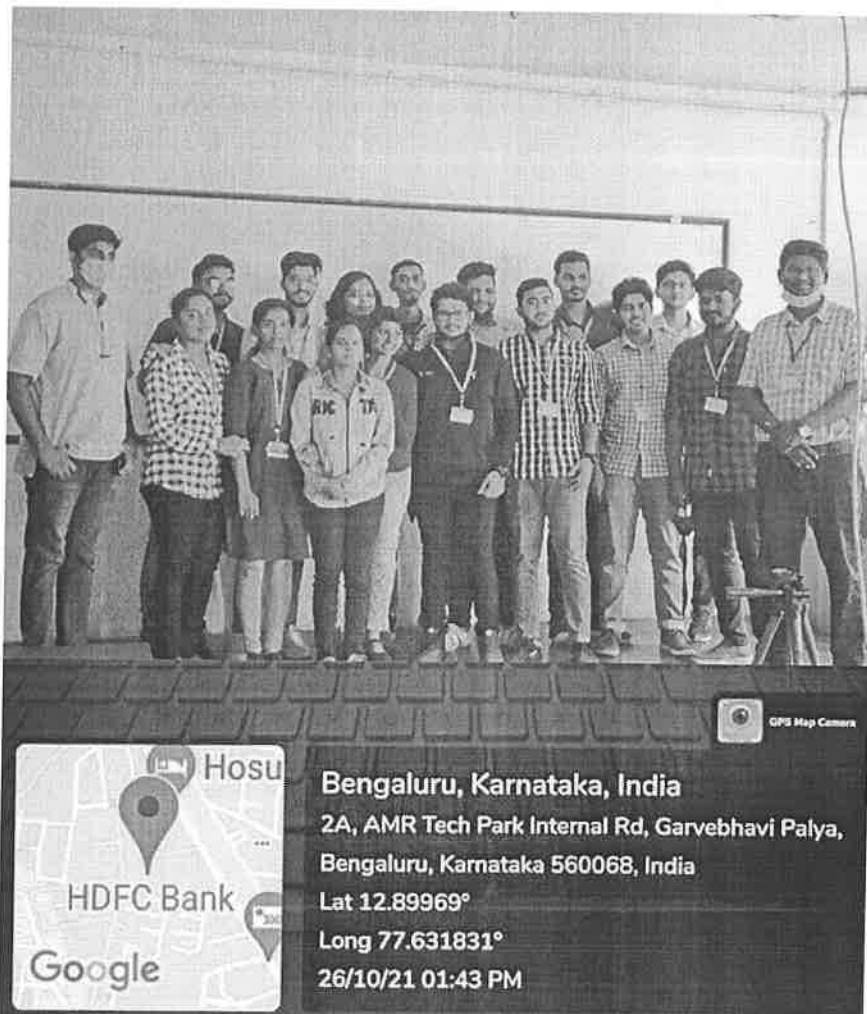

Metallurgical process for dissolution of metals by means of acid solution. In the thermal process, the E- waste was melted to recover the metal values as a metallic mixture.

3. Step-by-step processing of E-Waste Management: It is a 7-step process:

- I. Collecting and Transportation
- II. Shredding and Sorting
- III. Dust Extraction
- IV. Magnetic Separation
- V. Water Separation
- VI. Purification of Waste Stream
- VII. Preparing Recycled Material for Sale

4. AI Waste Sorting:

AI applications like machine vision can help automated systems differentiate between different kinds of waste.

Report on Pollution Awareness Programme

07.11.2021

Pollution has been an increasing world issue and nearly 5000 people die daily due to pollution related issue. Pollution levels are as high as they are due to human consumption and their interaction with the world causing destruction to the earth and the species living on earth. The people among the world need to unite to work as one to conquer pollution problems, especially because the fact is that humans are at fault. An outreach programme on “Pollution Awareness Program” was organised by 5th semester students of Department of CSE on 7th November 2021 at Doddagollarahatti, Kengeri. The main aim of this awareness programme is to create awareness importance on pollution. The awareness programme successfully managed to engage the community and the students visited different places, residential of the area and the heavily populated areas to educate people on importance of reducing pollution, especially soil pollution by reduce, reuse, recycle and waste management. The event was so successful that it had turned into a mega event. The students beautified the government school of Doddagollarahatti, Kengeri. The locals

appreciated the school beautification and the efforts of students to explain them about the soil pollution and the causes of throwing garbage wastes.

“Be a part of the solution not part of the pollution”. It is very important that we take action for a better tomorrow and for this educating people about causes of pollution and the effects it has on living is very much important.
