Replacement of plastic bags by cloth bags was advocated during the drive. Cleanliness drive was carried out in the college premises. 175 members participated in massive Shramadaan of plastic waste in the premises. All participants collected the plastic waste from departments, canteen and in the premises for segregation.

On 2nd June 2022, Department of Mechanical Engineering, The Oxford College of Engineering sponsored the No Plastic Awareness Programme at BTM Lake, Bangalore. The program focused on bringing awareness about the avoiding plastic as much as possible in environment. Participants of the event consisted of 26 students and a faculty from the department of mechanical engineering. The event began at 10:00 AM and all the students started rally to spread the awareness in the BTM Lake, Bangalore. The aim is to increase public understanding and shape community perceptions on the dangers of plastic pollution and available solutions, thereby empowering more people and organizations to take action. Community actions can include changes in individual attitudes and purchasing habits, increased sorting and recycling behaviour, responsible business processes and practices, among others.

No More Plastic

Date:17.07.2021

Name of the Event: No More Plastic

Month of event: 17.07.2021

Venue: Vivek Nagar

No. of Participants: 12

An outreach programme on - No more plastic- "No more plastic Initiative" on the occasion of plastic bag free day was organized by 8th semester students of Department of Electronics and communication on 12th July at Vivek Nagar. Plastic Bag Free Day is a global initiative that aims to eliminate the use of single-use plastic bags in the world. This work centered around Plastic Bag Free Day, on the 3rd of July each year .While plastic has many valuable uses, we have become addicted to single-use or disposable plastic -with severe environmental consequences.

Around the world, one million plastic drinking bottles are purchased every minute, while 5 trillion single-use plastic bags are used worldwide every year. In total, half of all plastic produced is designed to be used only once -and then thrown away.

Plastic waste is now so ubiquitous in the natural environment that scientists have even suggested it could serve as a geological indicator of the Anthropogenic era. We, the students of The Oxford College of Engineering, Department of ECE, took an initiative to keep our environment plastic free by picking up the plastics thrown on roads, the people around us appreciated our work and they also participated to keep the environment plastic free.

We the Department of EEE, carried out the Awareness program on Hazardous of Plastic materials on 15.07.2021. Initially , Pledge has been taken in the department along with Students, Faculty members. All the volunteers started rally to spread the awareness in the Hongasandra Region. Students began to approach the residents, commercial building persons to make make the awareness of Single usage plastic ban as well as they enquired their process of disposing the waste also.

The main objective of this campaign is to spread the awareness about the hazards of plastic and to impart knowledge about the reduction and re-use of plastic. Primary motto is to make them understand the use of alternatives of plastic material in order to reduce the usage of plastic and preserve the environment.

The Plastic Awareness Campaign, was carried out by the students and the faculties of the Department of Civil Engineering, The Oxford College Of Engineering, in order to create awareness of the the unnecessary use of plastic nowadays and how to utilize plastic in a fruitful manner.

The Waste will be the source of energy creation for future. Therefore, awareness was also brought about the corporation's, dry waste, wet waste segregation policy and to the surrounding shop vendors, construction workers etc.

In this regard a possession was carried out with the posters displaying various slogans to the common people around.

Landscaping with trees and plants

Trees also help to reduce ozone levels in urban areas. CO₂ is one of the major contributing elements to the greenhouse effect. Trees trap CO₂ from the atmosphere and make carbohydrates that are used for plant growth. They give us oxygen in return.
