Green Campus, Environment and Energy Usage Policy

A Green Campus is a place where environmentally friendly practices and education combine to promote sustainable and eco-friendly practices in the campus. The green campus concept offers an institution the opportunity to take the lead in redefining its environmental culture and developing new paradigms by creating sustainable solutions to environmental, social and economic needs of the mankind.

The Environment and Energy usage Policy of college is to manage energy in a systematic way in order that its impact on environment is minimize. The policy intends to explore the sources of renewable energy to scale back the burden of the government and to seek out substitute natural resources as solutions to the energy crisis. This environment and energy policy is binding for the institution and applies to the varied activities under taken by the institution. The policy helps the institution to inculcate efficiency and environmental awareness in day to day activities of the institution, which intern helps the institution to understand its responsibilities and commitment to conservation of natural resources and limit its usage.

Environment committee has been constituted at the institutional level which is liable for creating environment awareness among stakeholders, to undertake green initiatives, to conduct green literacy programs to save lots of energy and protect environment.

Green Campus Objectives

- The College is striving to develop its institution on a self – sustainable basis in the areas of power, water and cleanliness.
- The faculty, staff and students have to contribute collectively to develop an eco – friendly sustainable campus and disseminate the concept of eco – friendly culture to the nearby community and wherever possible.
- Awareness creations about environmental issues among students and employees
- Measure and reduce environmental emissions
- To ensure sustainable Green Campus through landscaping with trees and plants, reduce air pollution, and maintain a plastic-free environment.
- To restrict the entry of automobiles inside the campus
- Make use of battery-powered vehicles to reduce air pollution

Environment and Energy Usage Objectives:

- To access the energy usage of the institution and its impact on the environment.
- To reduce pollution emissions using environment friendly vehicles like using bicycles, public transportations and use of pedestrian friendly roads.
- To install Solar Panels within the entire campus wherever possible for generation of alternate energy.
- To install LED Bulbs within the entire campus to save lots of energy.
- To develop systematic rain harvesting and waste management mechanism within the institution.
- To plant Trees whenever wherever possible within the entire campus.

E-mail: engprincipal@theoxford.edu Web: www.theoxfordengg.org

- To develop and maintain Environment Management System and Energy Management System.
- To have MOU with government agencies, Municipal Corporation and the affiliating university with reference to Environment and Energy Management System.
- To take any additional measures and encourage use of advance technology to attenuate energy conservation, atmospheric emissions and noise.

Implementation:

The objectives of the policy are planning to be communicated to the faculty , students and other stakeholders at different forums- Student induction program, other training programs, during celebration of environmental day etc.

The policy objectives and targets are going to be implemented and reviewed on regular bases by the members of environmental committee.
