It was a one day program. The students were gathered in the college premises at 9.00 am and were told that the cleaning program will happen.

Cleaning Agara Lake

Cleaning Agara Lake

We went to Agara Lake by 10.30 am with few sickles and other equipments needed and started towards Agara lake. The entire team had cleaned the area around the lake first which was overgrown with bushes and other sorts of wild plants. It took us the whole day to clear the area of weeds and plastics which was strewn all over.

**3. A REPORT ON PARTICIPATION IN**

**TREE PLANTATION (GREEN INDIA- CLEAN INDIA)**

04<sup>th</sup> January, 2017

By

**NSS UNIT, THE OXFORD COLLEGE OF ENGINEERING**

Name of The Event	TREE PLANTATION under GREEN INDIA- CLEAN INDIA
Month of event	04th January, 2017
Venue	The Oxford College of Business Management, HSR Layout, Bangalore
Discussed Topic	Raised awareness among masses about climate change and global warming. Inspired to act towards the protection of the environment and focus on the need for conservation.
Organized by	The Oxford College of Engineering
No. of Participants	354
Output	The main objective of this program is to create responsiveness among the students about the need of the green in the environment and the importance of trees in our nature

**REPORT ON TREE PLANTATION (GREEN INDIA- CLEAN INDIA)**

A Tree Plantation Drive under the Green India- Clean India was organized by NSS unit of The Oxford College of Engineering with MBA students in The Oxford college of Business management, HSR Layout, Bangalore. The drive was inaugurated by Shri SNVL Narasimha Raju Chairman and he elucidated the significance of a clean- surroundings to the students.

With a drive to create responsiveness among the students about the need of the green in the environment and the importance of trees in our nature, the program was organized. 354 Students with 15 faculty members and Principal planted saplings.

#### **SWACHATHA ANDOLAN (CLEAN THE ENVIRONMENT)**

#### **IN MANGAMMANAPALYA VILLAGE**

**DATE: 6/2/2018**

By

**NSS UNIT, THE OXFORD COLLEGE OF ENGINEERING**

Name of The Event	<b>Swachatha Andolan (Clean the Environment) In Mangammanapalya Village</b>
Month of event	<b>06<sup>th</sup> February, 2018</b>
Venue	Mangamma Palya Village
Discussed Topic	<b>Swachatha Andolan (Clean the Environment)</b> is a country-wide campaign initiated by the Government of India in 2014 to eliminate open defecation and improve solid waste management in surrounding environment.
Organized by	The Oxford College of Engineering in association with NSS unit
No. of Participants	190
Output	The main objective of this program is to make people Understand and to eliminate <u>open defecation</u> and improve <u>solid waste management</u> .

The NSS unit of The Oxford College of Engineering has organized an event "CLEAN THE ENVIRONMENT" under the mission "SWACHATHA ANDOLAN" A total of 190 students of TOCE & 10 Faculty members participated in the programme and cleaned the slum area in Mangammanapalya Village. Prof. Jayakumar.N , Programme Coordinator, NSS has welcomed the gathering and he initiated cleaning activities in Mangammanapalya Village.

#### **4.REPORT ON INTERNATIONAL YOGA DAY ON 21<sup>ST</sup> JUNE**

Name of The Event	International Yoga Day
Month of event	21 <sup>st</sup> June, 2018
Venue	Brigade Komarla Apartments, Chikkalasandra, Bangalore & The Oxford College Of Engineering
Discussed Topic	To incorporate Yoga in our life style for better results at individual and organizational level.
Organized by	The Oxford College of Engineering in association with NSS unit
No. of Participants	250
Output	The main objective of this program is to create awareness among the students about YOGA, is the need of the day and with the initiative of AYUSH, Government of India it has gained momentum at College and School level to celebrate the International Yoga Day for a better society with better citizens.

On the occasion of International Yoga Day on 21<sup>st</sup> June, The Oxford College of Engineering in association with Art of Living organized and conducted Yoga Session for the Residents of Brigade Komarla Apartments, Chikkalasandra, Bangalore with 10 faculty, 12 staff and 250 students. Ms. Khushpinder Kaur Sangha and Ms. Tejaswi Vobilliseti, yoga teachers from Art of Living had taken the session from 10:30 to 11:30 AM. Dr. R.V. Praveena Gowda, Principal, The Oxford College of Engineering welcomed the yoga trainers and addressed the gathering. He mentioned that YOGA is the need of the day and with the initiative of AYUSH, Government of India it has gained momentum at College and School level to celebrate the International Yoga Day for a better society with better citizens.

#### **Highlights of the session include practicing the following:**

- Breathing techniques
- Relaxation exercises
- Stretching
- yoga asanas
- Sri Sri Meditation

#### **Benefits of the sessions for the faculty/Individual:**

- Higher energy levels
- Improved concentration

The National Service Scheme (NSS) was organized a blood donation camp in the college premises on Saturday, 27th December 2017. Dr. Amaranath. K, Director Dr. Praveen gowda, Principal of our college, inaugurated the camp, on this occasion our Director and Principal congratulated the NSS coordinators and students volunteers for coming forward to organize this event. The blood donation drive was organized in collaboration with Rotary Club, Bangalore.. It began at around 10 am and continued up to 2.30 pm, with a steady stream of donors throughout.

Medical Team

In the college premises the arrangements were made for the donors like registration counter, beds, sanitations, counseling and medical check-up of potential donors. A team of doctors and nurses had reached in time. The donors were provided with glucose water and food including biscuits, a banana and a juice. It was great to see more people than pre-registration numbers turning up in the venue.

After that, the doctor from Rotary Club delivered the speech extolling those who had donated their blood. Blood donation is a divine act of giving life. NSS motivational act has encouraged many to join hands with us as donors. 320 students have participated and donated blood in this camp.

**1.A REPORT ON HEALTH AWARENESS PROGRAM**

**ON 10<sup>TH</sup> OCTOBER, 2018**

By

**NSS UNIT, THE OXFORD COLLEGE OF ENGINEERING**

Name of The Event	Health awareness Programme
Month of event	10 <sup>th</sup> October, 2018
Venue	The Oxford College of Arts, HSR Layout
Discussed Topic	Concept of problems related to eyes which includes – Reflective Error Blindness, Temporary Blindness, Cataract and Eye surgery problems. Blindness causes due to sunlight, mal-nutrition, poor diet, dust particles etc.
Organized by	The Oxford College of Engineering in association with NSS unit
No. of Participants	199
Output	The main objective of this program is to understand the measures to be taken to avoid eye problems followed by an interactive session with the experts.

**Date:** 10/10/2018

**Venue:** The Oxford College of Arts, HSR Layout Bangalore

NSS unit of The Oxford College of Engineering, has conducted a Health awareness Program on 10/10/2018.

The resource person for the Program was Dr. M.Sudhakar, Primary Health Center, Doddakannahalli, The Programme started with the welcome address by the student coordinator. She briefly introduced the resource person for the day and the theme of the Programme, the mission and the vision. Total 199 students with 20 faculty members from various branches of Engineering college have attended with NSS coordinator.

### **3.REPORT ON WORLD AIDS DAY- AIDS AWARENESS PROGRAMME**

#### **IN RUPENA AGRAHARA VILLAGE**

**DATE: 1/12/2018**

Name of The Event	WORLD'S AIDS DAY
Month of event	1 <sup>st</sup> December,2018
Venue	Rupena Agrahara Village
Discussed Topic	AIDS AWARENESS programme
Organized by	NSS Unit ,The Oxford College of Engineering
No. of Participants	204

National Service Scheme (NSS) of TOCE have organized AIDS AWARENESS programme on Role of youth in Prevention and awareness of AIDS on 1/12/2018 at college Premises with 204 students with NSS Coordinator and 5 Faculty members.

The rampant spread of the HIV/AIDS virus over the past 29 years has created the most significant global public health crisis in modern era. Acquired Immuno Deficiency Syndrome (AIDS) caused by Human Immuno-deficiency Virus (HIV) is posing a serious challenge to the conceptual foundations and the practice of development planning worldwide. Nearly half of the new HIV infections are occurring in young people<sup>1</sup>. HIV/AIDS is retarding economic growth by destroying human capital by mainly affecting the young adults in the age group of 15–24 years who are in their most productive ages of life.

**4. REPORT ON NATIONAL YOUTHS DAY**

**(SKILL INDIA)**

**DATE: 14/01/2019**

NSS unit of The Oxford College of Engineering has organized a program on National youth day in college Premises. Swami Vivekananda birth anniversary falls on 12 Jan every year, which is also is celebrated as National Youth Day by the National Service Scheme (NSS). On this day the NSS volunteers goes through orientation session of the organization as such along with remembering the Swami Vivekananda contribution to the world.

NSS volunteers along with other non members too celebrated 14 Jan 2019 as Orientation cum Remembrance Day. Starting the event Mr. Vishnu and Ms. Dhivya NSS student volunteers threw light on the life of Swami Vivekananda and a brief about the NSS activities.

**Orientation cum Remembrance of Youth Day**

Thereafter NSS Coordinator, given the details about NSS and its association with Swami Vivekananda. He said why Swamiji's birth anniversary is celebrated as national youth day, because Swami Vivekanandaji could achieve in just his youth, feats so great that no other till

today has accomplished. Swamiji was of the opinion that service to all other human being is greatest work automatically resulting in serving of the nation. That's why the day has been included in the NSS yearly calendar. NSS songs were sung by Students in rhythm with Mr. Chandan. This singing inculcated a feeling of belonging and patriotism.

The students were thereafter divided into groups and asked to watch a movie on the life of Swami Vivekananda. Students were told to keenly and minutely watch the scenes as they will have to perform tasks in groups based on the life of Swamiji.

Student celebrating Youth Day

The documentary was a short one of about 40 minutes and inspired every one. His thought of giving back the individuality of the nation so that it is again known to the world, drew applause from students. Those who watched the scenes were impressed with the way Swamiji addressed the World Religion Congress at Chicago. He was the first person who got a standing ovation after the end of his address. His thought of "Sacrifice yourself for benefit of others" and "My India rise to a level where every nation look up to it", filled everyone present there with nationalism and pride.

**6.REPORT ON SAY NO TO DRUGS**

**Date: 25.07.2018**

Name of The Event	Say No To Drugs
Month of event	25.07.18
Venue	Krupanidhi PUC College Madiwala, Bangalore
Discussed Topic	Creating awareness among the people about the side effects of drug and help addicts recover from it
Organized by	The Oxford College of Engineering
No. of Participants	198
Output	<p>Our Faculties and NSS Student Volunteer have given the awareness process on drug consumption. We have successfully provided the information to have awareness and help people and professionals about the system .How Drugs are not the way to deal with stress. They change the way our brain works. This can lead to depression, anxiety, and other mental illnesses. If people are already having a mental health issue, <b>drugs</b> can worsen the condition.</p> <p>The main objective of this program is to make people Understand that it would affect them and even the people around them .Drug awareness enables children, youth and adults to develop the knowledge, skills, and attitudes to appreciate the benefits of living healthily (which may or may not include the use of psychoactive substances), promote responsibility towards the use of drugs and relate these to their own actions and those of others, .</p>

**8. FOLLOW THE TRAFFIC RULES: EMPHASIS ON RISK FACTORS**

Name of The Event	Follow the traffic rules: Emphasis on risk factors
Month of event	21.09.2018
Venue	Govt. PUC College Madiwala
Discussed Topic	Creating awareness among the people about the consequences of not following the traffic rules
Organized by	The Oxford College of Engineering
No. of Participants	188
Output	<p>The main reason behind spreading traffic rule awareness is to make people realise the loss they have cause of accident they cause, with their ignorance to traffic rule.</p> <p>The faculties and NSS member team also gave information about "motor vehicle act and traffic rules" and also said that the best way to keep others and yourself safe is to follow proper traffic rules. Whenever you drive a car follow the traffic rules, it is important to wear helmet while driving a two wheeler , obey the traffic lights to avoid accidents. One should always wear seat belt while driving a car. Avoid rash driving as fast speed is the core reason of accidents. Always carry all the paper of the vehicle, Don't drink while driving, Stop unnecessary honking, Don't violate the designated traffic zones, Stop using mobile phones while driving.</p> <p>To improve the traffic of the city, the team have collected the traffic police whatsapp number and helpline number and also said if any one breaks the traffic rules just make a video and send it to them.</p>

**9.AWARENESS PROGRAM FOR "YOGA AND MEDITATION FOR INCREASING CONCENTRATION  
IN STUDIES"**

Name of The Event	<b>Awareness Program for "Yoga and Meditation For Increasing Concentration In Studies"</b>
Month of event	<b>5.03.2019</b>
Venue	Krupanidhi PUC College Madiwala
Discussed Topic	Creating awareness among the people about the benefits of yoga and meditation for increasing concentration
Organized by	NSS Unit, The Oxford College of Engineering
No. of Participants	199
Output	<p>One of Our Faculties(Mr. Channappa Gowda) had taught some postures to increase concentration level. He had explained that One of the better ways to improve the <u>ability to concentrate on studies</u> is through yoga. Because of the hyper-functionality of our mobile phones, students live a very sedentary life these days. Their studies and leisure revolve only around digital screens. This is where the multi-utility of yoga comes in. The asanas and techniques not only improve concentration power but also aid in building physical fitness.</p> <p>Following asans were taught:</p> <ol style="list-style-type: none"> <li>1. Salutation Seal (Yog Mudra) 'Salutation seal' is the easiest and most convenient one to do at the time of <b>studies</b>. ...</li> <li>2. The Tree Pose (Vrikshasan) Vrikshasan. ...</li> <li>3. **1.A REPORT ON 'PLANTATION DRIVE' (GREEN INDIA- CLEAN INDIA)**

**In Association with BrahmaKumaris Foundation, At Begur Road, Bangalore**

By

**NSS UNIT, THE OXFORD COLLEGE OF ENGINEERING**

10<sup>th</sup> July, 2019

**"One Student, One Tree"**

**FOR THE ACADEMIC (2019-2020)**

**NSS Unit of The Oxford College of Engineering** had conducted plantation drive in Beguru Road as per the direction of Hon'ble HRD Minister Ramesh Pokriyal Nishank. This program was launched a new campaign **"One Student One Tree"** in line with the **Hon'ble Prime Minister Narendra Modi's idea of a green and healthy environment.**

The Awareness Program was conducted in association with **BrahmaKumaris Foundation** by Ms B K Megha Deep, who was the speaker for the same. There were 152 students participated with 5 Faculty members in this event. It was very informative Awareness session especially for the Students of our College. Director, Principal and the students were planted the saplings in our campus.

**2. A REPORT ON PARTICIPATION IN 'CAUVERY CALLING'**

**AN ACTION ORIENTED CAMPAIGN TO REVIVE THE CAUVERY RIVER**

**LAUNCHED BY ISHA FOUNDATION**

By

**NSS UNIT, THE OXFORD COLLEGE OF ENGINEERING**

08<sup>th</sup> September, 2019

**'CAUVERY CALLING' - An action oriented campaign to revive the Cauvery river**

**Launched by ISHA Foundation**

**About Cauvery Calling Campaign:**

An awareness rally for 'Cauvery Calling', an agroforestry initiative by the Isha Foundation, was launched here recently.

The rally was flagged off by Jaggi Vasudev, founder of the Isha Foundation.

The rally will cover 28 districts in both Tamil Nadu and Karnataka in the Cauvery basin, according to a press release.

The initiative aims to enable farmers to plant 242 crore sapling in the Cauvery basin in an attempt to increase the water levels of the river. The approach is economically lucrative to increase its acceptability in the farming community, according to the release.

Mr. Jaggi Vasudev will also lead a bike rally in September from Talacauvery in Karnataka to Tiruvarur in Tamil Nadu to garner support for the initiative.

**Cauvery Calling** is a first of its kind campaign, setting the standard for how India's rivers – the country's lifelines – can be revitalized. It will initiate the revitalization of Cauvery river and transform the lives of 84 million people.

**Targeted Impact:**

The simplest way to make Cauvery flow again is to plant trees. Cauvery Calling will support farmers to plant 242 crore trees in Cauvery basin by adopting agroforestry.

This will have the triple benefit of

- Improving soil health by replenishing organic content in the soil
- Reviving the river and groundwater levels by increasing water retention in Cauvery basin by an estimated 40%
- Augmenting farmer income through agroforestry, proven to increase farmers' incomes 300-800% in 5-7 years.

NSS unit of The Oxford College of Engineering along with 157 students and 14 faculties have participated in the Campaign on 8<sup>th</sup> September, 2019 at Tripura Vasini, Palace Grounds, Bangalore.

**3.A REPORT ON PARTICIPATION IN 'WATER CONSERVATION CAMPAIGN-JAL SHAKTI ABHIYAN'DURING SWACHHATA PAKHWADA - 2019**

**(FROM:1<sup>ST</sup> SEPTEMBER, 2019 TO 15<sup>TH</sup> SEPTEMBER, 2019)**

By

**NSS UNIT, THE OXFORD COLLEGE OF ENGINEERING**

11<sup>th</sup> September, 2019

**ABOUT SWACHHATA PAKHWADA- 2019:**

Inspired by the Hon'ble Prime Minister's impetus on Jal Sanchay, the Jal Shakti Abhiyan (JSA) is a time-bound, mission-mode water conservation campaign. The JSA will run in two Phases: Phase 1 from 1st July to 15th September 2019 for all States and Union Territories; and Phase 2 from 1st October to 30th November 2019 for States and UTs receiving the retreating monsoon (Andhra Pradesh, Karnataka, Puducherry and Tamil Nadu). During the campaign, officers, groundwater experts and scientists from the Government of India will work together with state and district officials in India's most water-stressed districts\* for water conservation and water resource management by focusing on accelerated implementation of five target intervention. The JSA aims at making water conservation a Jan Andolan through asset creation and extensive communication.

NSS unit of The Oxford College of Engineering, Bangalore organised 1-day 'Swachhata Pakhwada' with the theme of 'Jal Shakti Abhiyan' in the campus on September 11<sup>th</sup>, 2019.

As part of the 'Jal Shakti Abhiyan', the college has formed a team of volunteers from department of Civil Engineering to study and monitor the status of the following water conservation activities:

- Water conservation
- Renovation of traditional and other water bodies/tanks
- Ensuring all water cycling plant is functional.

Also the team has organised awareness campaign on Water conservation, functioning of water cycling plant to first year engineering students in the campus.

### Functioning of Sewage Treatment Plant

Water is the basic necessity of life used for many purposes. So, recycling water is necessary. Considering this in our mind, we have established a Sewage treatment plant in our college with the assistance of our faculty of civil engineering Department. The treated water is utilized properly for watering the plants throughout the campus and also for irrigation purposes.

#### **Steps of sewage treatment process:**

##### **I. Preliminary treatment of wastewater:**

The main objective of preliminary treatment is to remove gross solids (such as plastics, cloths, cans, dead body of animals etc), grits and fats from waste water.

Some of the treatment technique applied for preliminary treatment purpose are;

##### **i. Screening:**

Screening is used to remove gross solid waste like plastics, cloths, dead animals from waste water.

For this purpose waste water is passed through a metal screen which consists of vertical or inclined steel bars usually set 5 cm apart.

The removes gross solids are disposed by burning or composting.

##### **II. Primary treatment of wastewater:**

After removal of gross solids, grits and fats, next step in treatment is removal of remaining suspended solids as much as possible.

The main objective of primary treatment is to reduce strength of sewage by removing suspended materials.

Some common technique applied for primary treatment of sewage are:

##### **i. Sedimentation:**

Sedimentation tank is used for removal of suspended solids and some organic matters.

There are different types of sedimentation tank.

**CHILDREN'S EDUCATION SOCIETY (Regd.)**  
**THE OXFORD COLLEGE OF ENGINEERING**

(Recognised by the Govt. of Karnataka, Affiliated to Visvesvaraya Technological University, Belagavi.  
Approved by A.I.C.T.E. New Delhi.  
Recognised by UGC Under Section 2(f)  
Bommanahalli, Hosur Road, Bangalore - 560 068.  
Ph: 080-61754601/602, Fax: 080 - 25730551  
E-mail: engprincipal@theoxford.edu Web: www.theoxfordengg.org

**Neutralization:**

If sewage is highly acidic or basic, it is neutralized by adding base or acid to facilitate growth of microorganisms during secondary treatment process.

Common example is rectangular horizontal flow tank. In this tank sewage flow very slowly (1-2 feet/min) such that solids present in waste water settle at bottom.

Settled solids are periodically removed by sludge scraper.

This technique removes about 90% of suspended solids and about 40% of organic matters from sewage.

**Secondary treatment of waste water:**

In secondary treatment, dissolved or colloidal organic matters present in sewage are removed by utilizing microorganisms. In this step, microorganisms utilize organic matter and convert them into inorganic minerals.

Following changes occur in sewage during secondary treatment;

Organic matter (carbon) is oxidized into CO<sub>2</sub> and H<sub>2</sub>O

Organic nitrogen compounds are first converted into NH<sub>3</sub> and then into NO<sub>3</sub>

Colloidal matters are coagulated or precipitated out.

Thus the main purpose of secondary treatment of sewage is to reduce BOD level.

Various techniques are used in secondary treatment of sewage. Some of them are;

**Pressure sand Filter**

These filters are the most popular method for removal of turbidity from water. The Pressure Sand Filter consists of a multiple layer of sand with a variety in size and specific gravity. These filters are designed to remove turbidity and suspended particles present in the feed water with minimum pressure drop. These filters are custom designed to suit the process requirement..

**iii Tertiary treatment:**

**Disinfection with chlorine:**

Chlorine is a very widely used disinfectant, as it satisfies the criteria of an ideal disinfectant. The most commonly used chlorine compounds are — chlorine gas (Cl<sub>2</sub>), calcium hypochloride [Ca(ClO<sub>2</sub>)], sodium hypochlorite (NaOCl) and chlorine dioxide (ClO<sub>2</sub>).

**CHILDREN'S EDUCATION SOCIETY (Regd.)**  
**THE OXFORD COLLEGE OF ENGINEERING**

(Recognised by the Govt. of Karnataka, Affiliated to Visvesvaraya Technological University, Belagavi.  
Approved by A.J.C.T.E. New Delhi.

Ph: 080-61754601/602, Fax: 080 - 25730551  
E-mail: engprincipal@theoxford.edu Web: www.theoxfordengg.org

The disinfection efficiency of chlorine depends on the number of microorganisms in the water being treated, pH and temperature.

### **Working Principle of Sewage Treatment Plant**

1. The Sewage water (containing bathroom and kitchen waste) from entire college as well as the hostel buildings are received through the underground pipe lines.
2. It is passed through grid chamber, bar screen chamber and degreasing chamber. In the grid chamber heavy density materials like sand are removed. In the bar screen chamber floating material like leaves are separated. When the Sewage is passed through degreasing tank the floating greasy (Oily substances) materials are scrubbed away from the degreasing tank.
3. Then the Sewage is transferred to collection tank.
4. From the collection tank, Sewage is pumped to Bio reactor (Aeration tank). In the Bio reactor the Sewage is digested by aerobic bacteria using sewage as food materials.
5. The above treated water is passed through the sludge settling tank. From here the sludge is separated and passed to Sludge drying beds. After drying the sludge, it is used as natural organic manure for our gardening.
6. After removing the sludge, the water is collected in a separate collection tank.
7. This water is then pumped to sand filter and activated carbon filter. In the sand filter suspended particles are removed. In the carbon filter, any odour in the treated water is removed.
8. The filtered water is then collected in a sump. From this sump, the water is pumped to the entire college Gardens through over head tank

**ONE DAY WORKSHOP / AWARENESS CAMPAIGN ON SEWAGE TREATMENT PLANT**

**BY Mr . Somashankar R**

The workshop was on Sewage treatment plant by Mr. Somashekar R and Mr. Satish Kumar and has been conducted in the Department of civil engineering at 11 AM Bangalore on 20th, August, 2018-19. Total of 5 Faculty members and 175 students from Civil Department took participation in this workshop .They have addressed students on different steps involved in wastewater treatment and recycling of wastewater. Mr. Somashekar R explained about advance treatment techniques in brief to the students.

At the end they have addressed the students regarding the importance of Recycling of water and reusing of treated wastewater in civil engineers life.

**4..A REPORT ON SWACHHTA HI SEVA 2019 (PLASTIC WASTE FREE CAMPAIGN AT GAREBHAVIPALYA VILLAGE)**

**1<sup>st</sup> & 2<sup>nd</sup> October, 2019.**

By

**NSS UNIT, THE OXFORD COLLEGE OF ENGINEERING**

Name of The Event	SWACHHTA HI SEVA 2019 -PLASTIC WASTE FREE CAMPAIGN AT GAREBHAVIPALYA VILLAGE
Month of event	1st & 2nd October, 2019
Venue	Garebhavi Palya Village
Discussed Topic	Swachhta Hi Seva', an initiative of the Swachh Bharat Mission, aims to generate greater public participation, reinforce the concept of "sanitation as everyone's business" and culminate Mahatma Gandhi's 150th birth year celebration with a nationwide campaign.
Organized by	The Oxford College of Engineering in association with NSS unit
No. of Participants	146
Output	The main objective of this program is to make people understand Plastic Waste Management, given the detrimental effect of uncollected plastic waste on human beings, animals and the environment at large.

**SWACHHTA HI SEVA 2019 -PLASTIC WASTE FREE CAMPAIGN AT GAREBHAVIPALYA VILLAGE**

Swachhta Hi Seva 2019 campaign was launched by Prime Minister Narendra Modi on September 11, 2019. The theme of the campaign is '**plastic waste awareness and management**'.

Taking Prime Minister Narendra Modi's ambitious Clean India Mission a step forward, The Oxford College of Engineering, Bangalore has conducted Swachhata Hi Seva campaign in the campus for awareness creation on single use plastic.

**10.REPORT ON VISIT TO OLD AGE HOME VISIT PROGRAM**

Name of The Event	Old age home Visit program
Month of event	16.06.2019
Venue	Mathru Chaya Old Age Home Bangalore
Discussed Topic	Old age home Visit
Organized by	The Oxford College of Engineering
No. of Participants	75
Output	<p>Students are involved in creating awareness among the public, assisting the senior citizens in old-age homes and taking surveys of elder abuse.</p> <p>The sensation of Sharing is eternal. Sharing thoughts, knowledge, time, emotions and humanity are some common deeds which add values to our lives. Very few practice it, few are in search of it and many are dispossessed of this mantra to a worthy living. Mathru Chaya Trust is one such NGO which is engaged in bringing smiles on the faces of disadvantaged old men and women, who are in search of peace and happiness in their lives.</p> <p>Mathru Chaya is an abode to many such confused minds. You may be a helping hand, a deprived individual or a reason for deprivation, Come, Share, Smile and be a part of this non-government organization which believes in creating opportunities to be a society, be a part of the society. Mathru Chaya Trust has been trying to alleviate the sufferings of the poor and the deprived citizens in humble but most subtle way so that they can lead their life with dignity.</p> <p>As we plan to extend our services to various other needy faction of the society, we invite the likeminded to contribute their share of responsibility in form of service, financial support or moral support, because there is more in life than to be enjoyed just by self.</p> <p>Mathru Chaya Trust's Old Age Home is located in Agara village, Byrasandra main road, Kengeri hobli, Bangalore. Its nearness to Kanakapura main road, brings it closer to Bangalore.</p>

**12. REPORT ON WASTE MANAGEMENT AWARENESS PROGRAM**

Name of The Event	Waste management awareness program
Month of event	16.06.2019
Venue	Garvebhavi Palya Village
Discussed Topic	Waste management awareness
Organized by	The Oxford College of Engineering
No. of Participants	145
Output	<p>Students were highlighting the importance of managing House hold waste effectively. Students awakened the people about the need of Reduce, Reuse and Recycle of waste.</p> <p>To Promote and Develop Sustainable and Professional Waste Management Worldwide and the transition to a Circular Economy</p> <p>We need Earth where no waste exists. Waste should be reused and reduced to a minimum, then collected, recycled and treated properly. Residual matter should be disposed of in a safely engineered way, ensuring a clean and healthy environment. All people on earth should have the right to enjoy an environment with clean air, water, seas and soils. To be able to achieve this, we need to work together.</p> <p>Our Students have explain about following factors</p> <p>Single Stream Recycling.          Commercial Recycling.          Organic and Food Waste Recovery.          Multi-family Recycling.          Away from Home and Special Event Recycling.          Waste Awareness and 'How to Recycle' Communications.</p> <p>1. Measure your waste</p> <p>It is easier to manage and track your improvement on something that is measured. Start by recording the types and quantities of waste materials generated within your business.</p> <p>This could just be a quick visual assessment and estimation of amount and types of waste per week. As you change how you manage your waste, you can compare and see what difference your changes make to the amount of waste disposed to landfill.</p>

**CHILDREN'S EDUCATION SOCIETY (Regd.)**  
**THE OXFORD COLLEGE OF ENGINEERING**

Ph: 080-61754601/602, Fax: 080 - 25730551

E-mail: engprincipal@theoxford.edu Web: www.theoxfordengg.org

**2. Reduce**

To reduce the amount of waste going to landfill, consider:  
can waste be avoided or reduced by the way you procure goods and services or by changing your business operations?  
does another local business have a use for the waste materials produced by your business?  
what materials can be targeted for recycling?

**3. Recycle**

Find out what options are available locally for business recycling.

**4. Collection services**

It is a good idea to find out how levy fees will be managed by your waste service provider, and find out more about your waste collection services—how it impacts your ability to recycle and what options are available to you.

**5. Separating waste**

It's important to ensure that waste is correctly separated for recycling. Putting the wrong waste in contaminates the recycling. Check out the to help businesses communicate correct recycling and waste separation behaviours.

5. Shruthi K

During the Covid -19 pandemic days 156 of Our College students and Professors also contributed as COVID Warrior in various part of Bangalore with help them to awareness of COVID and its bad effects . More or less like the various stages of the journey of coronavirus. Our corona warriors also expanded the various form of their services . They helped to Organization and individuals jumped into the fray and there was a fair bit of mixing and cross-fertilization of roles. Thus we have started supplying rations and medicines, delivering cash and essential commodities, we started awareness campaigns and gave other assistance to the affected persons.

and show, across the length and breadth of India. The day, which is a national holiday, is dedicated to all those brave freedom fighters who fetched India her due respect and the much desired independence from the British rule. People in the country honor them, for sacrificing their lives for the freedom of their motherland. The day is celebrated by hoisting national flag, flying kites and organizing cultural activities in educational institutions. If you want to know all about the history of Independence Day, Day, then go through the following lines.

Celebration of 74<sup>th</sup> Independence Day

August 15, the Independence Day of India, is celebrated with great gusto. It is also a national holiday, with educational institutions, private and government organizations remaining closed, but opened for official celebrations in the morning.

It is a time to contemplate what we have achieved by freedom and how we achieved it.

**3.A REPORT ON 3.NSS DAY CELEBRATIONS**

**Happy  
NSS  
Day**

By

**NSS UNIT, THE OXFORD COLLEGE OF ENGINEERING**

24<sup>th</sup> September, 2020

Unit of National Service Scheme (NSS), The Oxford college of Engineering, Bangalore has conducted NSS Day, Youth Festival on 24th September 2020 in virtual mode. The National Service Scheme (NSS) is a public service program conducted by the Ministry of Youth Affairs and Sports. Every year, NSS day is observed on September 24th across India.

All Worlds is now in pandemic situation due to the spread of deadly virus covid19. Due to this many of us around the world are stopped our regular activities and are saving our lives by staying in home. So to celebrate the 51st NSS Day, we the TOCE, NSS team came forward to conduct few events like Elocution & Debate through online by using Teams. Microsoft paltform and boost up the confidence in our volunteers. Students from MBA,MCA & Engineering departments of TOCE have participated.

Date of the Event: 24-09-2020

4. A REPORT ON NATIONAL UNITY DAY - RASHTRIAEKTADIWAS'

By

NSS UNIT, THE OXFORD COLLEGE OF ENGINEERING

4<sup>th</sup> November, 2020

National Unity Day – Rashtriya Ekta Diwas - is being observed across the country today, on the occasion of the 145<sup>th</sup> birth anniversary of the Iron Man of India, Sardar Vallabhbhai Patel. Since 2014, October 31st is observed as the National Unity Day and people from all walks of life participate in the 'Run For Unity'.

NSS unit of The Oxford College of Engineering observed Rashtriya Ekta Diwas on 4<sup>th</sup> November, 2020 in virtual mode. The event had participation in large numbers. Teachers took an oath to preserve the unity, integrity and security of the nation in the spirit of unification of the county.

**5.A REPORT ON PARTICIPATION IN "JAN ANDOLAN CAMPAIGN ON COVID - 19"**

**PUBLIC HEALTH RESPONSE TO COVID -19: CAMPAIGN FOR COVID – APPROPRIATE  
BEHAVIOUR**

**ON 13TH OCTOBER, 2020**

**BY NSS UNIT, THE OXFORD COLLEGE OF ENGINEERING**

13<sup>th</sup> October, 2020

**ABOUT JAN ANDOLAN CAMPAIGN**

Our Honourable Prime Minister Shri Narendra Modi had launched a Jan Andolan Campaign on COVID – 19, by a tweet. The Jan Andolan Campaign is a Low cost, High Intensity Campaign driven by people's participation, for dissemination throughout the country using all media platforms. The campaign emphasizes on "Unlock with precautions" i.e., COVID – 19 Appropriate Behaviour in the new normal. The three key messages being highlighted are –

"Wear Mask

"Follow Physical Distancing"

"Maintain Social Hygiene"

The highlight of the campaign is the partnership and concerted effort of Central Government Ministries and Departments and the State Governments, along with their attached and subordinate offices, PSUs, private sector industry and business, etc., In this way, the campaign seeks to reach each and every citizen of India. In this regard, a circular was received from Government of India, Ministry of Information & Broadcasting, Shastri Bhawan, New Delhi.

**6. 'CELEBRATION OF 71<sup>ST</sup> ANNIVERSARY OF "INDIAN CONSTITUTION DAY/ SAMVIDHAN DIVAS' & WATCHING THE LIVE STREAM FROM PARLIAMENT**

**ON 26<sup>TH</sup> NOVEMBER, 2020**

By

**NSS UNIT, THE OXFORD COLLEGE OF ENGINEERING**

**26<sup>th</sup> November, 2020**

The existence and successful survival of "Democracy" in such diverse conditions is the most celebrated fact about our country and the constitution is its backbone. To reinforce the significance and importance of constitution the government of India declared the 26<sup>th</sup> of November as Constitution Day on 19 November 2015 by gazette notification in remembrance of the Father of Indian Constitution, Dr. B R Ambedkar.

The occasion was also celebrated on the premises of TOCE on 26<sup>th</sup> November, 2020 by NSS unit with all Teaching and Non-Teaching staff members.. It was marked by the conduct of a 'Special Assembly' in Board room of TOCE The celebration started with very apt words as the thought for the day "The flavor of tri-color should not be depicted only through our words but also through our actions."

Taking the pledge by Director, Principal, Principal-in-Charge & HODs.

Waste management (or waste disposal) includes the activities and actions required to manage waste from its inception to its final disposal. This includes the collection, transport, treatment and disposal of waste, together with monitoring and regulation of the waste management process and waste-related laws, technologies, economic mechanisms. An outreach programme on "Waste Management Awareness Programme" was organized by 6th semester students of Department of CSE on 17th July 2021 at JP Nagar 7th phase BOB colony Bangalore. The main aim of this awareness programme is to create awareness about the importance of waste management to maximum number of people for proper management of waste as it is important for building sustainable and liveable cities. The awareness programme successfully managed to engage the community and the students visited different places, residential of that area and heavily populated areas to educate

**8. REPORT ON "SAVE WATER AWARENESS PROGRAMME AT RAMA NAGARA" 17.07.2021**

**Water conservation** includes all the policies, strategies and activities to sustainably manage the natural resource of fresh water, to protect the hydrosphere, and to meet the current and future human demand. Population, household size and growth and affluence all affect how much water is used. Factors such as climate change have increased pressures on natural water resources especially in manufacturing and agricultural irrigation. Many countries have already implemented policies aimed at water conservation, with much success. An outreach programme on "**Save water Awareness Programme**" was organized by 6<sup>th</sup> semester students of Department of CSE on 17<sup>th</sup> July 2021 at Kanakapura, Arkavati river Bridge Ramanagara.

The main aim of this awareness programme is to create awareness about the importance of Water Management to a maximum number of people for proper management of water as it is important for Agricultural activities, building sustainable and liveable cities. The awareness programme successfully managed to engage the community and the students visited different places, residential of that area and heavily populated areas to educate people on importance of managing the water such as Rain water harvesting, closing the taps properly, water using them, and not polluting the rivers and oceans.

The Water Management Program was so successful that it has turned to a mega event. The locals appreciated the efforts of students to explain them about the importance of rain water harvesting, conservation of ground water and conserving water to the future generations. The activity was very much appreciated with benefited people.

Corona virus disease (COVID-19) is a deadly virus that continues to afflict many countries worldwide. The development of a COVID-19 vaccine to combat the disease's spread and devastating effects is still ongoing, and as the pandemic progresses, new, more effective vaccines are likely to be created.

An outreach programme on "Covid-19 Vaccination Awareness Programme" was organized by 6<sup>th</sup> semester students of Department of CSE on 18<sup>th</sup> July 2021 at Anekal Bangalore. The main aim of this awareness programme is to create awareness of Vaccination to maximum number of people to stay safe from the transmission and spread of corona virus (COVID-19). The awareness programme successfully managed to engage the community and the students visited different places, construction workers quarters and heavily populated areas to educate people on important public health measures such as wearing masks at all times, maintaining physical distancing whenever possible, and keeping hands sanitizing. The Vaccination awareness Program awareness programme was so successful that it has turned to mega event. The locals appreciated the efforts of students to explain them about need of Vaccination is very important to avoid 3<sup>rd</sup> wave of COVID-19. The activity was very much appreciated with benefited people.

After adjusting for the potential confounding, multi variable logistic regression analysis with backward conditional method indicated that educational level, place of residence, and communication media (mass media) were significantly associated with awareness towards

**FIRST AID PROCEDURE FOR CARDIAC ARREST PROGRAM**

**Dr R Ch A Naidu**  
HOD-CSE  
TOCE, Bangalore - 68

Date : 18-07-2021  
Venue : S. Medahalli  
Bangalore

**Dr. N. Kamman**  
Principal  
TOCE, Bangalore - 68

Cardiac Arrest is a sudden loss of blood flow resulting from the failure of the heart to pump effectively. Without prompt intervention, it can result in the person's death. Signs include loss of consciousness and abnormal or absent breathing. Some may even experience chest pain, shortness of breath or nausea immediately before entering cardiac arrest.

First Aid Procedure For Cardiac Arrest includes:

- Immediately call the helpline number 108 and confirm an ambulance.
- Perform Cardiopulmonary resuscitation (CPR).
- After CPR take the person to the nearest hospital once the ambulance.

Cardiopulmonary resuscitation (CPR):

Cardiopulmonary resuscitation (CPR) is an emergency procedure that combines chest compressions often with artificial ventilation in an effort to manually preserve intact brain function until further measures are taken to restore spontaneous blood circulation and breathing in a person who is in cardiac arrest.

Steps in Cardiopulmonary resuscitation (CPR):

E-mail: engprincipal@theoxford.edu Web: www.theoxfordengg.org

- Ensuring that scene is safe i.e., the place is good to perform CPR.
- Checking that whether the person is responding to touch and sound stimuli.
- Check for a pulse around the neck for less than 10seconds or atleast for 5seconds.
- If there is no pulse then we need to start compression.
- To do compression, place the heel of the palm in the middle of the chest in lower half of the breast bone. Later, we need to press hard and fast at the rate of 100-120 beats per minute at least to a depth of 5cm so that we can allow the chest to recoil.
- We need to give about 30 compressions followed by 2 breaths i.e., at a ratio of 30:2.
- If the person under cardiac arrest is known or relative, close the nose and can place a piece of paper on the mouth of the person and give them 2 breaths through mouth.

Note: Give mouth to mouth breath only if the person is close relative or known since it is unsafe now due to Corona Virus outspread.

- The ratio of 30 compressions and 2 breaths must be performed for 5 cycles.
- Once the 5 cycles is completed do a pulse check again.
- If there is no sign of pulse we need to perform compressions again. Suppose if we find pulse, turn the person over the left lateral position i.e., the recovery position.
- Finally, take the person to nearby hospital for further treatment and medication.

An outreach programme on “**First Aid Procedure for Cardiac Arrest**” was organized by 6<sup>th</sup> Semester students of Department Of Computer Science and Engineering on 18<sup>th</sup> July 2021 at S.Medahalli, Bangalore. The main aim of this programme was to educate people about the difference between Heart attack and Cardiac Arrest, brief the immediate the action they need to do when any of these happens and most importantly teach them the immediate first aid process that one must do when any person is a victim of Cardiac Arrest. Through this programme we were successful to explain the steps of Cardiopulmonary resuscitation (CPR) to the people of S.Medahalli. Through this awareness programme we showed the people each steps of Cardiopulmonary resuscitation (CPR) clearly through a live demo that we classmates organized so that the people could get clear on the first aid procedure that must be followed on Cardiac Arrest. We students tried to reach as much as people possible so that we deliver the life saving technique as much as possible through this outreach programme. The best point of this programme was the locals appreciated us and thanked us for providing this important knowledge. The place of residence, communication media and education level were significantly associated from this programme.

**11.REPORT ON "AWARENESS OF AIR POLLUTION"**

On 20<sup>th</sup> July, 2021, the students of The Oxford College of Engineering, Department of Information Science and Engineering organized an event to create awareness about the rampant air pollution in our city and country. The aim of this event was to create awareness regarding the effects of air pollution on the environment, our health, the health of flora and fauna around us and how it is linked to climate change and global warming.

This event was held in several locations around Bommanahalli. We spoke to people regarding how the smoke and dust filled air was affecting their lives and the health of their family. Arun, a 45-year-old resident of Bengaluru told us how he was facing problems with his breathing and had to be very careful about particulate matter around him. Another woman Fathima, told us about how the marble and granite factories around her home has caused sever problems for her 3-year-old son. We spoke to drivers stood at the signal without turning their engines off. They were told to turn off their engines while waiting for a signal to turn green. We encouraged people to purchase electric vehicles when they were planning to upgrade. This received a very positive response considering the rising prices of fuel.

Our next stop was at a petrol station. We spoke to the manager regarding the steps their company was taking to actively reduce emissions. He told us about their Go Green initiative wherein they had developed a special type of fuel that increases mileage of vehicle and reduces emissions. We also went to an auto stop to educate the auto drivers about the importance of regularly servicing their autos to increase performance and thereby reduce unnecessary emission from their vehicles. We also promoted the use of electric autos as they are more economical in the long run. Among the people who are affected adversely by air pollution are the traffic police of our city. They are exposed to vehicle emissions for a prolonged period which can cause health issues in the long run. When we spoke to them, they told us about how they make use of masks to reduce the effect of the pollution that they are continuously exposed to.

**12.REPORT ON "AWARENESS OF WEARING MASK"**

With the ongoing pandemic of COVID-19, wearing a mask, especially when in close proximity to others or in any public places is imperative to slowing the spread of this disease. Hence, the **Department of Information Science and Engineering of The Oxford College of Engineering** in collaboration with **NSS [National Service Scheme]** organized an event on the **Awareness Of Wearing Mask** on 22<sup>nd</sup> July, 2021. The ongoing pandemic and arrival of its new variants makes it a need of hour to highlight the necessity of wearing mask, not just for one's own safety but also for the others. The event was held in several locations around Roopena Agrahara and Central Silk-Board.

The main purpose of this event was to encourage and educate people to wear mask. We created awareness about the basic measures that need to be followed to keep the novel Corona virus at bay. We came across people who were not wearing masks, some wearing masks incorrectly and some using hand-kerchiefs instead; we distributed masks to them and educated them about the importance of wearing masks to prevent the further spread of COVID-19 and also many other respiratory problems.

At Roopena Agrahara bus stop, we found most street vendors transacting their business without wearing masks. We distributed masks to all of them and informed them -"The main benefit of wearing a mask is that it prevents them from getting ill or infected by COVID-19 and therefore, helps them keep their business running and also to be healthy. Specifically, it helps prevent the development of any illnesses that could affect your airways, which in turn could reduce the quality and length of your life."

As schools and colleges are currently closed, many children are out on the streets with their friends. We found many children who did not know the importance of wearing mask properly. We taught them how to wear their masks properly, told them about drinking hot water, maintaining social distancing, washing hands regularly and so on.

From this event we came to know that people who were wearing mask regularly in their everyday life perceived greater warmth towards others who also wear a mask than who do not. This indicates that the people who adhere to the social contract of wearing a mask tend to socially reward each other.

The government alone cannot curb the spread of the pandemic without the active support and participation of the people. Today's drive is a part of our sustained campaign of spreading awareness among the people about wearing mask and also on the precautions to be taken against the pandemic.

**13.REPORT ON SAPLING TRESS**

On the 24<sup>th</sup> of July, 2021 the students of department of ISE, TOCE along with the cooperation of their teachers, organized a sapling plantation drive at the Bilekahalli Park in Vijaya Bank Layout. What was once called the Garden City of India has turned into a concrete jungle with large commercial buildings and apartment complexes taking place of lush green gardens and nature. Trees are cut down and lakes are encroached upon to make space for the ever-growing metropolitan city.

The only saving grace for our city is whatever we have remaining of our gardens and parks. These parks are being maintained by the civic body and we decided to donate a couple saplings to one of them.

We approached the caretakers of the park and they were kind enough to help us students understand how and where the saplings were to be planted. They lent a helping hand while we were planting the saplings and let us know that the saplings would be taken care of properly.

They also encouraged us to plant whatever we can near our homes and make small terrace gardens. They explained that it was quite simple to maintain a small garden and we could grow fruiting plants like tomato, chili, herbs etc. and live sustainably. Saplings of Ashoka tree and Indian-almond could be planted alongside the roads as they require little care, grow fairly quickly and can survive harsh conditions.

Pictures of the sapling plantation drive have been attached below.

**14.REPORT ON "AWARENESS ON NUTRITIOUS FOODS"**

On 27<sup>th</sup> July, 2021, the students of The Oxford College of Engineering, Department of Information Science and Engineering in association with NSS Unit, organized an event to create "Awareness on Nutritious Foods" in our city. The aim of this event was to create awareness about eating plenty of vegetables and fruits. They are important sources of vitamins, minerals, dietary fibre, plant protein and antioxidants. People with diets rich in vegetables and fruit have a significantly lower risk of obesity, heart disease, stroke, diabetes and certain types of cancer.

This event was held in several locations around Mangammanapalya. We spoke to people regarding consuming nutritious food and provided them healthy fruits and encouraged them to eat nutritious food. We spoke to a street vendor and told her about the need to have nutritious food in their diet. Adequate and proper nutrition is an important aspect of a healthy lifestyle which is essential to promote an awareness of the nutrients contained in foods in relation to their roles in body maintenance, growth, reproduction, health, and disease prevention in humans.

We then spoke to flower seller who was around the age of 60 years, created awareness about the importance to have nutritious food regularly. Fruits and vegetables contain important vitamins, minerals and plant chemicals. They also contain fibre. There are many varieties of fruit and vegetables available and many ways to prepare, cook and serve them. A diet high in fruit and vegetables can help protect you against cancer, diabetes and heart disease.

We also went to a Pourakarmika and traffic police and explained them about the advantages of a diet with nutritious food. Vegetables and fruit are a handy snack food and are easily carried to work or school. Include them in everyone's meals and snacks for a healthy, well-balanced diet. Some suggestions include:

- Keep snack-size fruit and vegetable portions easily accessible in your fridge.
- Keep fresh fruit on the bench or table.
- Add fruit and vegetables to your favourite family recipes or as additions to your usual menus.
- Use the colour and texture of a variety of fruit and vegetables to add interest to your meals.
- Think up new ways to serve fruits and vegetables

Existing data suggests that despite the protective effects of fruits and vegetables, their intakes are still inadequate in many countries, especially developing ones. Consequently enhancing strategies to promote fruit and vegetable intake are essential for health promotion among population. A number of reviews confirm that a well planned and behavior focused nutrition education intervention can significantly improve behavior and health indicators.

Despite challenges in nutrition education intervention programs, they are considered as a good investment in terms of cost benefit ratio. Rapid improvement in trends of nutrition education can be seen in many countries and majority of interventions has been successful in increasing fruits and vegetables intake. It is recommended that health professionals use multiple interventions to deliver information in several smaller doses over time to ensure improved outcomes.

**15. REPORT ON "AWARENESS PROGRAMME ON COVID-19 PANDEMIC" ON 17<sup>TH</sup> APRIL, 2021**  
**AT CARMELRAM, MULLUR VILLAGE AND BOMMASANDRA VILLAGE**

An outreach programme on "Awareness Programme on Covid -19 Pandemic" was organized by 6<sup>th</sup> semester students of Department of Biotechnology in association with NSS UNIT on 17<sup>th</sup> April at Carmelram, Mullur Village and Bommasandra Village. The main aim of this awareness programme is to create awareness to maximum number of people to stay safe from the transmission and spread of corona virus (COVID-19). The awareness programme successfully managed to engage the community and the students visited public places, construction workers quarters and heavily populated areas to educate people on important public health measures such as wearing masks at all times, maintaining physical distancing whenever possible, and keeping hands clean by washing them with soap and water for no less than 30 seconds or sanitizing hands. The awareness programme was so successful that it has turned to mega event. The locals appreciated the efforts of students to explain them about different types of food to boost their immunity and the activity was very much appreciated.

**16.REPORT ON "COVID-19 VACCINATION AWARENESS PROGRAMME" ON 17<sup>TH</sup> APRIL AT BOMMASANDRA VILLAGE"**

An outreach programme on "Covid-19 Vaccination Awareness programme" was organized by 6<sup>th</sup> semester students of Department of Biotechnology on 17<sup>th</sup> April at Bommasandra Village. The goal of the " Covid-19 Vaccination Awareness programme" is to increase motivation to get a COVID-19 vaccine by delivering effective, tailored messages targeted to segments of the population that have higher levels of vaccine hesitancy. Good communications about the vaccines can help overcome hesitancy and promote acceptance. In this regard Covid-19 vaccination awareness programme was organized to raise awareness and debunk the myths related to vaccinations among the local people of Bommasandra village. The locals appreciated the efforts of student to explain them about the vaccination and the activity was very much appreciated.

**17. REPORT ON "AWARENESS PROGRAMME BOOSTING IMMUNITY THROUGH BALANCED DIET" ON 17<sup>TH</sup> APRIL AT KANAKAPURA VILLAGE**

An outreach programme on "Awareness Programme on Boosting immunity through Balanced diet" was organized by 6<sup>th</sup> semester students of Department of Biotechnology in association with NSS UNIT on 17<sup>th</sup> April at Kanakapura Village. The stark rise in the cases of novel coronavirus (COVID-19) across the world and now in India has raised numerous doubts among people. Questions like whether or not a nutritious diet can prevent an individual from contracting the infectious disease are doing the rounds. The World Health Organization (WHO) has announced dietary guidelines during the COVID-19 outbreak stressing the importance of a balanced diet to maintain a strong immune system and to avoid or minimize chronic diseases and infections. Basic hygienic practices, proper dietary and lifestyle behaviors are also essential for prevention and treatment of respiratory viral diseases, such as COVID-19. During this COVID-19 pandemic, almost all countries were either on lockdown or maintaining social distancing. This has several implications on food habits both individually and globally. There are several attributable factors to the food insecurity and inability to achieve balanced diets during this COVID-19 pandemic. For a viral disease like COVID-19, where no pharmacological strategies for prevention or treatment are presently available and where the exact time of the ending of the alarming situation is unknown, There is need to explore nutritional strategies for enhancing Immunity. In this regard an outreach programme was organized to create awareness among the locals of Kanakapura Village about the daily foods and fruits and about the food habits they have to follow to boost their immunity to fight against Covid-19. The locals appreciated the efforts of students to explain them about different types of food to boost their immunity and the activity was very much appreciated.

**18.REPORT ON OUTREACH PROGRAMME- WORLD EARTH DAY -PLANT A TREE INITIATIVE ON  
22<sup>ND</sup> APRIL AT RAMNAGARA FOREST RESERVE**

An outreach programme on "World Earth Day -Plant a tree Initiative" on the occasion of world earth day was organized by 6<sup>th</sup> semester students of Department of Biotechnology on 22<sup>nd</sup> April at Ramnagara Forest reserve. **Plants are the most important in our life.** They, directly or indirectly, provide us life. We get oxygen, food, shelter from them and they are the major source of rain in our environment. Most people depend on plant economically to survive. **But the reckless deforestation due to urbanization and industrialization is the major source of pollution all over the world.** Several new diseases have been originated due to the increased pollution. For the solution of destructive problem and to promote plantation, and to create awareness among the locals the Department of Biotechnology has organized Plant a tree initiative in the Ramnagara forest reserve. Under the program, **trees have been planted** in the foothill of Ramnagara forest reserve. A positive effect of the Plant a tree initiative has been observed among the localities. They are impressed by the program and now they are promoting plantation. These newly planted trees will definitely help to conserve the environment and provide shelter to the passer-bys. All villagers appreciated the Plant a tree initiative **and thanked for it.**

**19.REPORT ON OUTREACH PROGRAM- AWARENESS OF ZIKA VIRUS AND IMPORTANCE OF COVID VACCINE -AN INITIATIVE TAKEN PLACE ON 20 JULY 2021 AT BWSSB, DOMLUR, BANGALORE**

**Organizing Committee**

Dr. N. Kannan, Principal, The Oxford College of Engineering	Dr. Manjunath, B. K., Head of the Department of Biotechnology, The O.C.E. Bommanahalli	Dr. Valarmathi, K., Associate Professor, Dept. of Biotechnology
---	---	---

**Date : 20-07-2021**  
**Venue : BWSSB Domlur**  
**Bangalore**

An outreach program on awareness of Zika virus and importance of Covid Vaccine was organised by sixth semester students of Department of Biotechnology in association with NSS UNIT on 20 July 2021 at BWSSB, Domlur.

With the whole country battling the corona virus, there is no point in neglecting the things that we are yet to face. Zika virus which has been around in the world since 1947 had its first outbreak in India on September 21 2018. Zika virus is a flavivirus transmitted primarily by mosquitoes of Aedes Egypti genus, which bite during the day.

Creating awareness or spreading knowledge on this virus was important especially in front of BWSSB(Bangalore Water Supply and Sewerage Board) because they are the ones who deal with water transport and sewage which is more prone to mosquitoes and are hence in more risk of the virus infection. Symptoms are generally mild and include fever, rash, conjunctivitis, muscle and joint pain, malaise or headache. Symptoms typically last for 2–7 days. Most people with Zika virus infection do not develop symptoms. Zika virus infection during pregnancy can cause infants to be born with microcephaly and other congenital malformations, known as congenital Zika syndrome. Infection with Zika virus is also associated with other

complications of pregnancy including preterm birth and miscarriage. An increased risk of neurologic complications is associated with Zika virus infection in adults and children, including Guillain-Barré syndrome, neuropathy and myelitis.

There is every chance of it being a pandemic just like in Brazil if not taken care of. Its important to know the preventive measures on how to safeguard ourselves by taking small measures such as preventing stagnant water around your place and using mosquito repellents. The vaccines for this is being formulated by the WHO and until then its our responsibility to have taken good measures for COVID too and this is also one of the most important steps to be considered about which a we explained in BWSSB, Domlur.

For giving us an opportunity to give an outreach program in their office, as a token of gratitude we donated a pesticide kit and a disinfectant which was formulated by us and given to the respective institute. A positive effect of the outreach program has been observed among the councillor, engineer and the workers there. They are impressed by the program and now they spoke about taking preventive measures for Zika Virus. The pesticide kit will possibly be of help as it definitely keeps the workspace safe and hygienic.

**Dr. Manjunath B.K** HOD, Professor, Dean R&D, Dept of Biotechnology  
**Dr. Valarmathy K** Associate Professor, Dept of Biotechnology

An outreach programme on “Awareness on Delta plus Virus and Importance of Vaccination” was organized by 6th semester students of Department of Biotechnology in association with NSS UNIT on 21st July at Adigondanahalli village. We all are aware of the current situation in the world and how we all are being affected due the pandemic. We had an outreach programme on Awareness of Delta plus virus. It is the latest corona virus variant which has been formed as a result of Delta acquiring a mutation called K417N in the spike protein. It has symptoms similar to that of Covid-19 and also includes abdominal pain, skin rash, toes and fingers discoloration, sore throat, diarrhea, loss of smell, headache & runny nose. Awareness was created about delta plus virus among villagers. Villagers were guided about the precautionary measures and also spoke about importance of vaccination. Vaccination helps to build our immunity. Villagers were made to understand that how important the vaccination is and we were happy that almost 70% of the people over there already got vaccinated. An outreach programme on “Awareness on Personal and Public Hygiene, Covid-19 related guidance for firefighters” was organized by the 6<sup>th</sup> semester students of Department of Biotechnology in association with NSS UNIT on 26<sup>th</sup> July 2021 at the Electronic City Fire station.

Maintaining personal and public hygiene is essential for more than one reason; social, health, personal, psychological or just as a way of life. Maintaining a good standard of hygiene helps keep infections, illnesses and bad odors at bay.

The motive of our outreach programme was to give an insight on the effects of maintaining a good personal and public hygiene routine, and the health hazards that firefighters face due to Covid-19 and the possible ways to avoid it.

Personal hygiene can be achieved by, washing hands with soap and water on a daily basis. The habit of washing fruits and vegetables can help one avoid contact with harmful pathogens. When one experiences the symptoms of flu or any other infectious diseases, it is highly recommended to isolate until full recovery.

Public hygiene is the practice of protecting and improving the health as a community. The types of public hygiene include mental hygiene, occupational hygiene, oral hygiene, voice hygiene, pulmonary hygiene, and so forth.

Respiratory illnesses continue to be a major health concern for firemen and emergency responders who are frequently exposed to gases, chemicals, and smoke in the course of their duties.

Firefighters are more likely to acquire chronic illnesses such as persistent coughs, hoarseness, asthma, and allergies. In more severe situations, firemen may be diagnosed with a variety of malignancies, including lung and bronchial cancers, as well as chronic interstitial, autoimmune, and constrictive illnesses of the respiratory system.

In critical Covid-19 cases, the infections can damage the walls and linings of the air sacs in your lungs. As your body tries to fight it, your lungs become more inflamed and filled with fluid. This can make it harder for them to swap oxygen and carbon dioxide.

There are a few things you may do to lower your risk of lung disease.

- Work with your employer to ensure that you have access to the necessary protective equipment.
- Check that you're utilizing it appropriately and just when it's suggested.
- Attend regular trainings on how to reduce your exposure to hazardous substances.
- Outside of work, limit your exposure to lung irritants.
- Don't smoke, and try to avoid secondhand smoke as much as possible.
- Check your house for excessive levels of radon (the second biggest cause of lung cancer), and if you find them, make careful you reduce them.

E-mail: engprincipal@theoxford.edu Web: www.theoxfordengg.org

- Make wearing a mask a normal part of being around other people. The appropriate use, storage and cleaning or disposal are essential to make masks as effective as possible

**2) Explained about the basics of how to wear a mask:**

- Clean your hands before you put your mask on, as well as before and after you take it off, and after you touch it at any time.
- Make sure it covers both your nose, mouth and chin.
- When you take off a mask, store it in a clean plastic bag, and every day either wash it if it's a fabric mask, or dispose of a medical mask in a trash bin.
- Don't use masks with valves.

Corona Awareness at Garvebhavi Palya

**3) Explained about the advantages of taking the vaccination**

- "Getting vaccinated can decrease the chances of hospitalisation and requirement of supplementation of oxygen with more chances of recovery at-home,"

E-mail: engprincipal@theoxford.edu Web: www.theoxfordengg.org

- It's been suggested vaccinated people have less chance to develop symptomatic Covid infection.
- Helps in breaking the chain of transmission
- A vaccinated individual may develop antibodies that can neutralise the virus, and break the chain of transmission. This leads to the development of herd immunity once the significant population is vaccinated and has circulating antibodies for the same.
- Vaccinated individuals can have a faster recovery after two doses of vaccine.”
- Vaccination protects the vaccinated persons and those around them who are vulnerable to the diseases, reducing the risk of diseases spreading among family members, school mates or colleagues, friends, neighbours and other people in the community.
- When enough people in a population are immune to an infectious disease, the disease is then unlikely to spread from person to person.

**23.REPORT ON "PLANTATION OF TREES" ON 13.07.2021**

Trees are very important in our ecological cycle. Considering the manifold benefits of trees, including that they release oxygen into the air, absorb unpleasant odours as well as harmful gases such as carbon dioxide, carbon monoxide and sulfur dioxide from the air and purify it, protect us from dangerous ultra-violet rays, provide us with food and the pivotal role played by trees in preventing soil erosion, maintaining ecological balance and most especially in lessening the effects of global warming.

Tree plantation is not just something that should be done; instead, it is a necessity, the urgent need of the hour. Planting of trees is especially important to protect our environment against air pollution and global warming. To this end, our young volunteers have been actively involved in organizing tree plantation campaign.

An outreach program of "Plantation of trees" was organized by Department of Electronics And Communication with the faculty coordinator Prof. Mohanathi K for 2<sup>nd</sup> semester students on 13<sup>th</sup> of July, 2021 at Ambalipura lake premises Bangalore. The main aim of this program was to create an awareness of the importance of trees in our daily lives. The program successfully managed to bring the awareness of the effects of lack of trees and the importance

of planting more trees. This program encouraged our students and the local residents to plant more trees in their locality and help balance the eco-system.

This program turned out to be a mega event and our students were greatly appreciated by the local residents and lake authorities for their effort in planting trees and helping create awareness of planting more trees. Overall this program of plantation of trees was a great success and we believe, we as students were able to do our level best in creating awareness and were able to achieve our goal to make our planet more greener in the future.

Plantation of tree activity banner

Tree plantation is not just something that should be done; instead, it is a necessity, the urgent need of the hour. Planting of trees is especially important to protect our environment against air pollution and global warming. The drive was a huge success, empowering students with substantial knowledge of environment and plants.

The saplings were supplied bought from nearest nursery. In order to restore the eco-balance of the afforestation drive was taken with all seriousness. Anyway, participants were highly enthusiastic to make it a big success. The students planted saplings, and fenced them and watered the plants. Every step of the programme was appreciated by the representatives of the administration and the local forest department officials. The programme created a great stir among the general public too.

Since the very beginning trees have given us the gift of life's essentials, such as food and oxygen. Many generations passed and we discovered other many uses of trees and exploited them for our survival. They are so rich in value and significance that their uses have only increased as to satisfy the needs created by our modern lifestyles. To begin with, the wood from the trees was used as fuel and the fruits were consumed by humans. The shade was used to escape heat and fire to escape in cold.

As we evolved and started having modern problems, trees yet remained the same but cater to our modern problems as well. Trees can cut down on energy and conserve a lot of electricity if planted in the right place and they provide you with the richest oxygen available in the atmosphere. However, we overlook these benefits and take trees for granted. We cut the very trees that give us so much to live with and then mull over the fact that nature is being unfair. Well, we need to respect Mother Nature and value the great advantages that trees bless us with every day.

**24.REPORT ON "NO MORE PLASTIC" ON 17.07.2021**

An outreach programme on - No more plastic- "No more plastic Initiative" on the occasion of plastic bag free day was organized by 8<sup>th</sup> semester students of Department of Electronics and communication on 12th July at Vivek Nagar. Plastic Bag Free Day is a global initiative that aims to eliminate the use of single-use plastic bags in the world. This work centered around Plastic Bag Free Day, on the 3rd of July each year .While plastic has many valuable uses, we have become addicted to single-use or disposable plastic -with severe environmental consequences.

Around the world, one million plastic drinking bottles are purchased every minute, while 5 trillion single-use plastic bags are used worldwide every year. In total, half of all plastic produced is designed to be used only once -and then thrown away.

Plastic waste is now so ubiquitous in the natural environment that scientists have even suggested it could serve as a geological indicator of the Anthropogenic era. We, the students of The Oxford College of Engineering, Department of ECE, took an initiative to keep our environment plastic free by picking up the plastics thrown on roads, the people around us appreciated our work and they also participated to keep the environment plastic free.

We the Department of EEE, carried out the Awareness program on Hazardous of Plastic materials on 15.07.2021. Initially, Pledge has been taken in the department along with Students, Faculty members. All the volunteers started rally to spread the awareness in the Hongasandra Region. Students began to approach the residents, commercial building persons to make the awareness of Single usage plastic ban as well as they enquired their process of disposing the waste also.

The main objective of this campaign is to spread the awareness about the hazards of plastic and to impart knowledge about the reduction and re-use of plastic. Primary motto is to make them understand the use of alternatives of plastic material in order to reduce the usage of plastic and preserve the environment.

On 17.07.2021, we had been to Old Age Home which is run by Prasanth Charitable trust Which is located in Hongasandra, Begur Road. Due to COVID 19 restrictions we had been asked to come with less numbers. With due care with all the precautions with 35 students and 4 faculty members we went there at 10 a.m. . Visited the elders there and our students had a nice time with them for one hour and asked about their problems and other details. On behalf of our department faculty members and students we gave some amount as well as dress materials, Provisional items also. Elders felt happy with the students and emotionally felt like their family members.

**31.REPORT ON "TRAFFIC AWARENESS CAMPAIGN " ON**

**16<sup>TH</sup> JULY 2021 AT SILK BOARD & BOMMANAHALLI JUNCTION , BANGALORE -560068**

Traffic Awareness campaign done by Dept of MCA , The Oxford College of Engineering , Bangalore .

" It is necessary that everyone should follow traffic rules. All those rebels who don't care to follow the rules are in constant danger. It is our moral duty to follow road safety rules", following words were said by Principal Dr N Kannak on the account of Traffic awareness campaign done in The Oxford College of Engineering , Bangalore . "Traffic Awareness Campaign was organised by of N.S.S Unit of the college. Chief Guest for the event Mr. R Suresh who came on behalf of traffic police. Principal Dr N Kannan and Dr. M S Shashidhara HOD-MCA welcomed the delegation .

Our students have made aware to people about the fact that every year in our country near about 1 lakh and 50 thousand people lose their life in road accident. Lakhs and lakhs of people become disabled due to recklessness shown while not properly following traffic rules. The main cause for all the pain and loss of life is the fast and furious driving done by the people. We can stop these accidents if we follow the traffic rules properly. The main reason behind spreading traffic rule awareness is to make people realise the loss they have cause of accident they cause, with their ignorance to traffic rule.

The students also gave information about "motor vehicle act and traffic rules" and also said that the best way to keep others and yourself safe is to follow proper traffic rules. Whenever you drive a car follow the traffic rules, it is important to wear helmet while driving a two wheeler , obey the traffic lights to avoid accidents. One should always wear seat belt while driving a car. Avoid rash driving as fast speed is the core reason of accidents. Always carry all the paper of the vehicle.

E-mail: engprincipal@theoxford.edu Web: www.theoxfordengg.org

To improve the traffic of the city, the team of traffic police gave their whatsapp number and helpline number and also said if any one breaks the traffic rules just make a video and send it to them.

Principal Dr N Kannan said that this interactive session for creating traffic awareness among people was very important as it makes them aware about the importance of their and others life. Students should come forward and follow these traffic rules obediently. Everyone should wear helmets and seatbelts while driving the vehicle. Be aware and also aware others. Foreign country implies traffic rules properly which cause more safety on roads than ours, where having accident on road is story of everyday. Follow the traffic rules it is very important.

स्वच्छ भारत अभियान

Clean Green NDIA

Swachh Bharath Abhiyan Campaign done by Dept of MCA , The Oxford College of Engineering , Bangalore .It is the mantra of Mahatma Gandhiji, Father of Nation. He demonstrated, propagated and insisted for individual and community cleanliness throughout his life. Following his footprints, Swachh Bharat Mission campaign achieved encouraging results. This vision will be translated into action by bringing in community participation for clean toilets and integrated waste management to make Surroundings open defecation free, zero waste, dust free, plastic free and green. Final year MCA students have organized rally to bring awareness to keep surrounding clean among community people.

To contribute in swachh Bharat Abhiyan activity & undertake cleanliness drive Shramdan activities also been carried out at various streets of madodhar village. Students have encouraged community people to join in swacha activity. They have participated in shramdan activity and shown their willingness and interest to keep surrounding clean.

The Swachh Bharat Abhiyan is the most significant cleanliness campaign by the Government of India. Its responsibility of the entire citizens to keep their surrounding clean. Community people were encouraged to maintain their surrounding clean. Thus the students of TOCE college have initiated one steps towards- cleanliness".

Areas where more number of households are resorting for open defecation Commercial Hotspots- Areas where most of floating population and workers in commercial establishments openly urinate or defecate due to non- availability of toilets or public toilets or poor awareness. The areas include commercial localities, passage of buildings, bus alighting points and near railway stations etc. Institutional Hotspots – Areas where the institutional lands are used by the citizens to defecate or urinate in open such as open areas in Govt Hospitals, Agriculture market yards, RTC bus stands, railway tracks, Govt lands etc.

Solid waste can also be defined as the organic and inorganic waste materials produced by households, commercial & industrial establishments that have no economic value to the owner. Further, as per biodegradability, solid waste can be classified as "biodegradable" and "nonbiodegradable" waste 3 Statutory towns are urban areas defined by administrative units that have been defined by 'statute' as urban such as municipal corporations, municipalities, cantonment boards, notified town area committees.

**33.REPORT ON "SAVE WATER- SAVE EARTH " CAMPAIGN ON**

**23<sup>RD</sup> JULY 2021 AT MANGAMPALYA, BANGALORE -560068**

**Save Water Campaign Poster**

We all know that life cannot be imagined without water, yet no concrete steps are taken by us for its conservation. So, it is our responsibility to conserve water for our future generations because without water every kind of life will be destroyed from the earth. Without water, trees, animals, birds, crops and even human beings themselves will have no existence on earth. Therefore, this is the time when we need to take effective steps to deal with it, taking this matter seriously. Our mother equivalent earth has always protected us and has ensured that we get everything we need. In this way, many types of natural resources exist on earth for the good of mankind. But it is unfortunate that instead of making good use of these natural resources, we only exploit them and one of these natural resources is water which is the basic basis of all life on earth.

It is believed that the first origin of life on earth originated in water. This clean water is the most important basis of life on earth. We have not only exploited this natural resource but have

**Save Water Campaign Awareness**

We always hear that we should save water because it is a very important resource for our future, but we always take these things lightly. We use water in various ways, from getting up in the morning to sleeping at night, in fact, it cannot be imagined to live even a day without water. But in every task we waste a lot of water. Although we have been told in our schools since childhood that water is present in 70 percent of our planet, but this whole water cannot be used for our daily use activities. Our government and other organizations periodically spread awareness about water conservation to educate people about this subject. There are several ways by which we can save water in our daily life, such as turning off tap water when not in use, re-using washing water, using bucket instead of shower while bathing. We can easily give our valuable contribution in saving water. If we do not adopt these methods in time, then in the coming time we will have to face a terrible problem like water crisis. We humans cannot live

without water, but it is most wasted by us. We should not forget that life is not possible without water on the earth, so to face this crisis, we all have to work together to conserve water.

**Save Water Campaign Awareness**

Still, clean water is a very important item in some rural and backward regions of India and many people have to walk for several kilometers daily for only two buckets of water. On the other

E-mail: engprincipal@theoxford.edu Web: www.theoxfordengg.org

hand, some of us waste huge amounts of water every day. Receiving clean water for drinking should be the right of every citizen. We have to understand the importance of water and have to be aware of the causes of water crisis. For this, we also have to educate our children about the careful use of water and water conservation for the future. Clean water is also contaminated by us, due to which it is not potable for us. Many projects have been started by the government to make people aware about water conservation, yet the problem remains as it is and many people are still facing this dreaded problem of water crisis as before. .

It is very easy to understand that if we do not start conserving water, we will not survive. Water is the basis of all life on earth. Although we think that there is sufficient amount of water available on the earth, we forget that it is available in a limited quantity. If we do not start efforts to conserve water, the reserves of fresh water from the earth will soon be exhausted. Water conservation should be the first priority of all government institutions and citizens, so that this problem can be resolved.

Water conservation has many positive effects on society. Due to increasing urbanization, the level of ground water is rapidly decreasing, due to this there is very little left for our essential activities like farming and irrigation etc. If we conserve water, then we will have enough water available for the fields and this will increase crop yields more.

**36.REPORT ON "COVID-19 VACCINATION AWARENESS PROGRAMME" ON**

**13<sup>TH</sup> JULY 2021 AT MANGAMMANAPALYA, BANGALORE -560068**

An outreach programme on "Covid-19 Vaccination Awareness Programme" was organized by 4<sup>th</sup> semester students of Department of MBA in association with NSS unit of The Oxford College of Engineering on 13<sup>th</sup> July 2021 at Mangammanapalya village Bangalore .

**Total 90 students and 4 Faculty members have participated in the campaign.**

Creating awareness about necessity of COVID-19 Vaccination

Coronaviruses are a cluster of viruses characterized by RNA as the genetic material having an envelope covering it. The word 'corona' means crown like and this comes from the presence of crown like structures on the surface of these viruses. COVID-19 or SARS-CoV-2 is one among the members of the coronavirus family.

Increasing demand for and acceptance of COVID-19 vaccines is essential for achieving “community immunity” (herd immunity) and returning to many of the social and work activities important to us all. Although many people are eager to get vaccinated, there are also significant proportions of the population who are hesitant, reluctant, or mistrustful of the vaccines and the

Creating awareness about necessity of COVID-19 Vaccination

Vaccines are the biological provisions and they work by helping the immune system to identify, remember and rescind a pathogen. It trains the immune system to remember the pathogen as foreign and identify it in any future contamination through key immune effector (T & B cells). Along with demolition of a pathogen or pathogen infected cells by cytotoxic T cells or antibodies produced by B cells, the generated memory cells will assist in immunological memory to remember the pathogen for a long time and prevent re-infection. Thus, vaccine persuades both immediate protections via antibody production as well as long term defensive by inducing immunological memory.

Road safety campaigns are an important way to spread awareness among people about road safety measures and rules. The results of road safety campaigns depend however, first of all, on the manner of communication to road users. Since the target of the campaigns are people or groups of people, and as the characteristics of their behaviour is different from one to another.

Creating awareness about Road Safety at Garvebhavipalya

Volunteers in Creating awareness about Road Safety at Garvebhavipalya

Road safety does not happen accidentally, but requires deliberate efforts by government and its many partners. Too often, road safety is treated as a transportation issue, not a public health issue, and road traffic injuries are called "accidents", though most could be prevented. As a result, many countries put far less effort into understanding and preventing road traffic injuries than they do into understanding and preventing diseases that do less harm.

Water is the valuable gift of God on the earth. Life occurs on the earth because of the obtainability of water. Itself being distasteful, neutral and pale, it adds taste, color and nice odor in the life of living beings on the earth. It is found everywhere and known as life. It takes nothing from us but gives life to us. It has no shape but takes the shape of vessel we store it. We find it everywhere in rivers, seas, tanks, wells, ponds, etc but we lack clean drinking water. Three-fourth part of the earth is full of water however we need to conserve water as there is very less percentage of clean water.

Volunteers in Creating awareness about Save Water- Save Life

**SIMPLE WAYS TO SAVE WATER:**

- We should use shower heads with low-flow, low-flush toilets and composting toilets or dual flush toilets.

- Collect rain water during raining season to use in toilet flush, watering plants, sprinkling in garden, etc. Using raw water like sea water or non-purified water in toilet is also good.
- We should be customary of reusing or recycling left-over water.
- We should promote rainwater harvesting, using high-efficiency clothes washers, weather-based irrigation controllers, garden hose nozzles, low flow taps in wash basins, swimming pool covers, automatic faucet, etc for water conservation.

Activity Organizing Committee Group Photo

Lack of water is a big issue in many countries. It is a symbiotic factor and important element to which life depends on. The level of drinking water under the ground is becoming less because of the disturbance in the natural filtering system. Deforestation and lack of plants causes rain water to run away instead of going inside the ground. We should follow all the key activities regarding save water from loss, unnecessary use and waste as well as damage of water quality.

With an aim to create awareness among citizens of Bangalore regarding saving water, and utilizing waste water, Department of MBA in association with NSS unit of The Oxford college of Engineering has organized a Road Safety Campaign at SalarpuriaGreenage Apartments, Next to The Oxford College of Engineering Bommanahalli, Bangalore.

**39.REPORT ON "AWARENESS ON IMPACT OF SOUND POLLUTION" ON**

**19<sup>TH</sup> JULY 2021 AT HONGASANDRA, BANGALORE -560068**

An outreach programme on "Awareness on Impact of Sound Pollution" was organized by students of Department of MBA in association with NSS unit of The Oxford College of Engineering on 19<sup>th</sup> July 2021 at Hongasandra, Bangalore.

**71 Students and 4 faculty members have participated in the awareness campaign.**

Figure 1: Creating awareness about Impact of Sound Pollution at Hongasandra

Sound/Noise pollution happens when unwelcome sounds enter the environment. The potential health effects of noise pollution include increased stress levels, sleep disturbance, or hearing damage.

Some examples of noise pollution sources include Trusted Source:

- construction

- motorized vehicles
- crowds
- concerts
- aircraft

Volunteers in Creating awareness about Impact of Sound Pollution at Hongasandra

Pollution occurs when a contaminant enters the environment, causing undesirable effects. There are several types of pollution, including:

Air pollution

Water pollution

Light pollution

Noise pollution is the spread of unwanted sounds into the environment.

**Impact on mental health:** Unwanted sounds can have a range of mental health effects.

The brain is always monitoring sounds for signs of danger, even during sleep. As a result, frequent or loud noise can trigger anxiety or stress. With continued exposure to noise pollution, a person's sensitivity to stress increases Trusted Source.

People living with noise pollution may feel irritable, on edge, frustrated, or angry. If a person feels they cannot control the amount of noise in their environment, its impact on their mental health intensifies.

### Impact on physical health

The physical health effects of noise pollution can occur as a direct or indirect result of noise exposure.

In severe cases, loud sounds can directly cause hearing impairment. Some forms of noise-induced hearing impairment include:

- abnormal loudness perception
- tinnitus, which causes a persistent high-pitched ringing in the ears
- paracusis, or distorted hearing

Some research also suggests that noise pollution may indirectly contribute to other health conditions.

Short-term exposure to noise pollution can temporarily raise blood pressure and increase blood viscosity. There is also an association between long-term exposure to noise and higher rates of cardiovascular disease.

The review authors suggest that this may occur due to the impact of noise pollution on stress hormone levels and the nervous system. Over time, this stress may contribute to the development of disease.

Impact of Sound Pollution Awareness campaign by MBA students at Hongasandra, Bangalore

### How to reduce noise pollution

- **Reducing noise from appliances:** Items, such as air conditioning units, heaters, fans, and other appliances, can contribute to overall noise levels in the home. Try turning them off more often or setting a timer, so they only switch on at certain times.
- **Reducing noise from media devices:** Consider the volume and duration of noise from music, televisions, radios, and video games. Avoid having unnecessary noise playing in the background for long periods, or listening to sounds at too high a volume. It may be useful to set aside dedicated time for watching TV or listening to music.

**CHILDREN'S EDUCATION SOCIETY (Regd.)**

E-mail: engprincipak@theoxford.edu Web: www.theoxfordengg.org

- **Repair or replace old machinery:** Old appliances, vehicles, and other items can be louder than newer models. Consider upgrading or replacing noisy household items.
- **Soundproofing:** Adding insulation strategically around the home can help muffle sounds from other rooms, neighbors, or outside. Rugs, carpets, and curtains may also help.
- **Create more quiet time:** Try to regularly set aside time for quiet activities, such as reading, puzzles, or creative hobbies. Avoid playing music or having background noise during this time.
- **Ear protection:** If loud noise is unavoidable, use ear protection, such as earplugs or earmuffs, to reduce its impact.

Impact of Sound Pollution Awareness campaign by MBA students at Hongasandra, Bangalore

Noise pollution significantly impacts public health. Research suggests it can raise stress, affect mental health, and contribute to developing health issues such as high blood

pressure. Direct exposure to loud or persistent noise can also lead to hearing impairment. Children are particularly vulnerable to the negative health effects of noise pollution. It may be possible to reduce levels of noise in the home, school, or workplace with simple changes, such as soundproofing and turning off devices.

With an aim to create awareness among citizens of Bangalore regarding various problems due to Sound pollution, the Department of MBA in association with NSS unit of The Oxford college of Engineering has organized awareness about Impact of Sound Pollution at Hongasandra.

Awareness about traffic is very much required for the safety of lives while driving on the roads. Now a days, traffic issues are increasing daily basis. The overspeed issues, overtaking on signals and many more issues are increasing day by day with psychological impact on the drivers. Therefore, the approach was made in order to create awareness about traffic matters and 'traffic awareness program' was conducted as an extension activity by the students of Civil Engineering Department, The Oxford College of Engineering.

An outreach program on "Traffic awareness program" was organized by 4<sup>th</sup> & 6<sup>th</sup> semester BE students of Department of Civil Engineering on 23<sup>rd</sup> July 2021 at Bommanahalli Junction Bangalore .The main aim of this awareness program is to create awareness about traffic related matters like what are the danger effects of the overdriving, effects about the drink and drive issues and more. The awareness program successfully managed to engage the community and the students in understanding about the importance of following the traffic

The Plastic Awareness Campaign, was carried out by the students and the faculties of the Department of Civil Engineering, The Oxford College Of Engineering, in order to create awareness of the the unnecessary use of plastic nowadays and how to utilize plastic in a fruitful manner.

The Waste will be the source of energy creation for future. Therefore, awareness was also brought about the corporation's, dry waste, wet waste segregation policy and to the surrounding shop vendors, construction workers etc.

In this regard a possession was carried out with the posters displaying various slogans to the common people around.

The activity was carried out at the Garvebhavipalya, service road stretch in the surrounding vicinity of our college campus.

**27<sup>TH</sup>JULY 2021 AT PRASANTHA CHARITABLE TRUST, BANGALORE -560068**

On 27-07-2021, Students and faculties of Civil Engineering Department had visited A Retirement Home which is run by Prasantha Charitable trust Which is located in Hongasandra, Begur Road. Because of COVID 19 reasons we had been asked to come with less numbers. With due care with all the precautions went there at 5P.M. Visited the elders there and our students had a nice time with them for one hour and asked about their problems and other details.

On behalf of our department faculty members and students we gave some amount.

Elders felt happy with the students and emotionally felt like their family members.

We the Department of Mechanical engineering, carried out the awareness program on SWACHH BHARAT – GO GREEN INITIATIVE on 26.07.2021. The initiative focused on bringing awareness about the importance of growing plants and keeping our surroundings clean and healthy. The event began at 11:00 AM and all the students indulged themselves in cleaning open area of the MATHA'S INTERNATIONAL SCHOOL located at GAREVEBHAVI PALYA, BANGALURU and completing the SWATCHH BHARAT initiative. The students then planted various types of plants and watered them thereby completing the GO – GREEN initiative. Then, a keynote speaker Mr. Shreyas DV spoke about the importance of clean and green environment. The speaker added that the importance of undertaking the event was to develop a habit of maintaining the environment clean and grow more plants and trees to support living. Finally, the event evaded with a program of honouring the principal of MATHA'S INTERNATIONAL SCHOOL for giving each participants the opportunity to carry out the above said initiative successfully.

awareness about the importance of road safety. The event began at 11:00 AM and all the students started rally to spread the awareness in the Bommanahalli region. Students were standing at the front of the vehicles, and few people in person and make the awareness about the importance of road safety. The main objective of the programme is to spread awareness about the hazards of not following the road safety and to bring awareness about the importance of road safety to prevent any accidents occurring. Primary objective is to make them understand the importance of road safety and make them understand the catastrophic disasters that occurring due to bending the road safety rules. Awareness programme is well appreciated by the local people traffic officials.
