Report

Title: Technical Training on “Android App Development”

Objective: To provide training on Android App development skill and prepare them to industry ready requirements.

Date: 7th March to 14th March 2017

Time: 9:00 AM to 4:00 PM

Location: The Oxford College of Engineering

Organized by: Etherglobal Services Pvt. Ltd.

Audience: 8th Sem Students of CSE (65)

Speaker: Mr. Ananta K and Mr. Rohit Kumar

Method Adopted: Theory sessions along with hands on sessions

Materials Used: Android Studio Software

Description: The Training was planned for the android app development skill for the students which would help them in their career, placements and their final year project work. All the sessions were well organized and it was also fully practical based session. Students were also exposed to interview questionnaires and real-life projects. They have been trained with the advanced tools for solving problems, projects and interview questions.

Outcome:

Students will be able

- To build an Android app using the Java language.
- To develop the competences needed to align technology solutions with business goals.
- To face the emerging challenges in the job market.

Report

Title: Technical Training on "JAVA and J2EE"

Objective:

- To create starting point for individuals interested in starting a career as a software engineer professional.
- To provide basic level and associate level of Java training.

Date: 7th March to 14th March 2017

Time: 9:00 AM to 4:00

PM

Location: The Oxford College of Engineering

Organized by: Seventh Sense Talent Solutions

Audience: 8th Sem Students of CSE (33)

Speaker: Mr. Venkat Ramanan

Method Adopted: Theory sessions along with hands on sessions

Materials Used: JDK Packages

Description (only 10-15 lines): The Training was planned for the development of Java skill for the students, which would help them in their career, placements and their final year project work. All the sessions were well organized and it was also fully practical based session. Students were also exposed to interview questionnaires and real-life projects. They have been trained with the advanced tools for solving problems, projects and interview questions.

Outcome:

Students will be able

- Use an integrated development environment to write, compile, run, and test simple object-oriented Java programs.
- Read and make elementary modifications to Java programs that solve real-world problems.
- Identify and fix defects and common security issues in code.

HOD/CSE

**CLOSURE REPORT
FOR
CCNA TRAINING CLASSES**

Organized by: Department Of ISF.

Conducted by: Etherglobal Services Pvt I.td

Duration of the course: 45 hrs,[Theory-30 hrs & lab practice -15 hrs]

Trainers Name: Mr. Baldev,CCNA,CCSA,CCSE,CCSP,JNCIA-FW,SCNA,IPV6 Forum certified Engineer

Venue For Theory & Practical Sessions : The Oxford college of Engineering ,
ISF Seminar Hall

COURSE OVERVIEW

Department of Information Science & Engineering, The Oxford college of Engineering has organized CCNA Training classes for final year students of ISE has conducted by Ether global services Pvt Ltd, from 07th March 2017 to 13th March 2017. A total of 33 students enrolled for this program. Total duration of the course was 45 hrs, which includes 15 hrs of lab practices. This course has covered entire CCNA syllabus given by CISCO. Pre assessment test was also conducted on 07th March 2017 & post assessment test was also conducted on 13th March 2017 for all the students.

All the CCNA theory classes & lab practices were held at ISE Seminar Hall, The Oxford College of Engineering from 9:00 am to 4:15 pm dated from 07th March 2017 to 13th March 2017.

The trainer Mr. Baldev was conducted all classes for students. Mr. Baldev holds many certifications such as CCNA, CCSA, CCSE, CCSP, JNCIA-IW, SCNA, & IPv6 Forum certified Engineer. All topics were explained well with proper examples. Also the classes were interactive.

Additional benefits given to students apart from the course:

- Cisco Packet tracer software was shared with the students
- PPT's & PDF of course contents were shared with the students
- Softcopy of Lab Practical Materials were the students.

By doing this course the students got an understanding of the following key networking technologies and concepts:

- Basic history of networking, OSI reference model and basic network design principles, Local and wide-area networks (LANs and WANs) including Ethernet and VLANs
- IP addressing and TCP/IP protocols ARP, RARP, BOOTP, and ICMP, Routers and routing protocols, bridges, and switches Cisco's Internetwork Operating System (IOS), Network management and Security

At the end of this course revision classes and mock test were conducted. After completing these course students were advised to write CCNA exam.

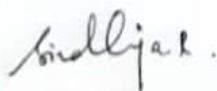

Benefits of CCNA Certificate:

Cisco Certified Network Associate (CCNA) is one of the most vouched and valued IT certification throughout the world. CCNA has become one of the most sought after network certifications. CCNA can help to land a job in networking & to increase the opportunity in job.

Assessment tests: Both pre & post assessment tests were conducted and there is good progress & knowledge acquisition noticed.

Certificates: Then CCNA course completion certificates were issued on 24th March 2017.

Feedback: Feedback was collected from students & also from the trainers. Sample feedback forms are attached for conformation.

HOD-ISE

**CLOSURE REPORT
FOR
BIGDATA TRAINING CLASSES**

Organized by: Department of ISE

Conducted by: Ether Global Services Pvt Ltd

Duration of the course: 45hrs, [Theory-30 hrs & lab practice -15hrs]

Trainers Name: Mr.AryaAwasthi

Venue For Theory & Practical Session: The Oxford college of Engineering

COURSE OVERVIEW

Department of Information Science & Engineering, The Oxford college of Engineering has organized BigData training classes for final year students of ISE has conducted by Ither global Services Pvt Ltd, from 7th March 2017 to 13th March 2017. A total of 27 students enrolled for this program (ISE -27). Total duration of the course was 45hrs, which includes 15 hrs of lab practices. This course has covered entire Big Data concepts and technologies. ETC assessment test was also conducted on 7th March 2017 & post assessment test was also conducted on 13th March 2017 for all the students.

All the Big Data theory and Lab practices classes were held at The Oxford College of Engineering on 7th March 2017 to 13th March 2017.

The Trainer Mr. Arya Aswathi was conducted all classes for students. Mr. Arya Aswathi has experience of analysis and optimization of Big Data and methodologies like Hadoop, Storm, Spark, NoSQL (Cassandra, Mongo DB), Designing and deploying of efficient Cloud Architecture (VPC) on AWS and Duplicate detection of news articles using Spar Streaming, Hbase with Hadoop (YARN) Clus. All topics were explained well with proper examples. Also the classes were interactive.

Additional benefits given to students apart from the course:

- Hadoop, Hbase, sqoop, pig Hives software and installation steps was shared with the students
- PPT & PDF of course contents were shared with the students
- Software of Lab Practical Materials were the students.

By doing this course the students got an understanding of the following key Big Data technologies and concepts.

- Basic of Hadoop, HDFS Architecture, HDFS Directory, basic HDFS shell command, Map Reduce job including Mapper and Reducer.
- Hive (data types, external tables, Hive querying language, loading data in table and manage table and partitioned tables), Pig, Hbase, sqoop Related operations.
- At the end of this course revision classes and mock test were conducted.

After completing these course students were aware of the installation steps and concepts related to Hadoop, Hive, Hbase, Sqoop.

Benefits of Big Data Certificate:

- Master the various components of Hadoop ecosystem like Hadoop 2.7, Yarn, MapReduce, Pig, Hive, Impala, HBase, Sqoop, Flume, and Apache Spark
- It can be implemented in real life projects in the domains of banking, telecommunication, social media, insurance, and e-commerce

Assessment tests: Both pre & post assessment tests were conducted and there is good progress & knowledge acquisition.

Certificates: The Big Data course completion certificates were issued on 24/3/17

Feedback: Feedback was collected from students & also from the trainers. Sample feedback forms are attached for confirmation.

DEPARTMENT OF ELECTRICAL AND ELECTRONICS ENGINEERING

Academic Year 2016-17

Report of Technical Training

Title: Technical Training on “AUTOMATION(PLC & SCADA), DRIVES, LV SWITCHGEAR”

Objectives: To become familiar with this Industrial automation is the use of control devices such as PC/PLCs/PACs to control industrial processes and machinery by replacing as much as possible labor intervention and dangerous assembly operations with automated ones. In industrial control a wide number of process variables such as temperature, flow, pressure, distance, and liquid levels can be sensed simultaneously

Date: 7th Mar to 13th Mar 2017

Time: 9:00 AM to 4:00 pm

Location: The Oxford College of Engineering

Organized by: PROLIFIC SYSTEMS AND TECHNOLOGIES PVT LTD

Audience: VIII Sem Students of Electrical and Electronics Engineering

Number of Students: 28

Speaker: Mr. Shivashankar, Mr. Anilkumar, Mr. Abhilash

Method Adopted: Theory sessions along with hands on sessions

Materials Used: 2 PLC, 1 SCADA ,1 DRIVE

Description Programmable Logic Controller (PLC) is a digital computer interface used for the automation of various electro-mechanical processes in industries. The program is written on a computer and is downloaded to the PLC via cable. Supervisory Control And Data Acquisition (SCADA) is a control system architecture that uses computers, networked data communications and graphical user interfaces for high-level process supervisory management.

Report of Technical Training

Title: Technical Training on “EMBEDDED SYSTEM-CRANES VARSITY”

Objectives: To become familiar with this syntax, semantic and all the main features of C. Understand how to implement any concepts into programs. Be aware of the challenges and pitfalls of C and master the technique to avoid them. Understand the main strategies to build the simplest, most flexible and reliable code. To understand the different data structures and their uses.

Date: 7th Mar to 16th Mar 2017

Time: 9:00 AM to 4:00 pm

Location: The Oxford College of Engineering

Organized by: Cranes Software International Limited

Audience: VIII Sem Students of Electrical and Electronics Engineering

Number of Students: 88

Speaker: Ms.Shubhra, Ms. Nischita R, Ms. Ramya, Mr. Chand Basha

Method Adopted: Theory sessions along with hands on sessions

Materials Used: Linux operating system-GCC compiler

Description: The full form of an ARM is an advanced reduced instruction set computer (RISC machine), and it is a 32-bit processor architecture expanded by ARM holdings. The applications of an ARM processor include several microcontrollers as well as processors. The architecture of an ARM processor was licensed by many corporations for designing ARM processor-based SoC products and CPUs. This allows the corporations to manufacture their products using ARM architecture. Likewise, all main semiconductor companies will make ARM-based SOCs such as Samsung, Atmel, TI etc.

THE OXFORD COLLEGE OF ENGINEERING

Hosur Road, Bommanahalli, Bengaluru-560 068

Approved by AICTE, New Delhi, Accredited by NBA, New Delhi & Affiliated to VTU, Belgaum)

DEPARTMENT OF ELECTRICAL AND ELECTRONICS ENGINEERING

Outcomes: Students gets familiar with ARM 7 based LPC2148 microcontroller pin configuration. For the electrical and electronic engineering students, this information will give a basic knowledge on pin configuration, I/O ports memory, as well as registers. This will assist students to understand the basics of the microcontroller. A global ARM community partners have developed semiconductor as well as product-design corporations includes an employs like engineers, designers, & developers. Students will get to work in all microcontroller based companies.

DEPARTMENT OF MECHANICAL ENGINEERING

Academic Year 2016-17

SUMMARY REPORT

Sl. No.	Title	Duration	Venue	Faculty I/c
1.	Design of Circuit for Fluid Power System	2 Weeks	Mechatronics Lab	Sri. Raghavendra N, Sri. Raghu P

1. Design of Circuit for Fluid Power System:

A two weeks add on course has been conducted between 07.01.2019 to 21.01.20219 successfully under the Guidance of Sri. Raghavendra N and Raghu. The Lab is conducted in Mechatronics Lab. Total number of Students enrolled for the course is 30 No's. The course is offered to Final Year students.

The course enable students to apply the basic knowledge of fluid power system into practical use, an elementary knowledge of Fluid power system application is imparted through designing of simple circuits. This will help the students to learn practical use of knowledge of Fluid Power System in the Modern Industry which is not provided in the Syllabus.

COURSE OUTCOME

Title: Design of Circuit for Fluid Power System

Duration: 02 week

Venue: Mechatronics lab

Faculty: Raghavendra N, Raghu K, Nagaraja T.V.

Theory syllabus

Unit – 1: Introduction to the design of hydraulics circuits, control elements, direction control valve, check valve, pressure control valve, symbolic representation (06 hours)

Unit – 2: PLC Applications in fluid power systems
Introduction, trouble shooting-oil hydraulics, Trouble shooting-pneumatics (06 hours)

Text books: 1.Fluid power with application-Anthony Esposito
2. Oil hydraulics-S.R. Majumdar

Reference book: Hydraulics and pneumatics-Andrew parr

Practical syllabus

1. Hydraulic clamping circuits for machine tools
 2. Hydraulic circuits for feed operation in machine tools
 3. Speed control of hydraulic cylinder using direction and speed control valves
 4. Hydraulic circuit for plastic injection molding machine
 5. To build on/off circuit for single and double acting cylinders (03x06=18 hours)
- Industrial visit:

Course outcomes:

At the end of course the student will be able to:

- Get an insight into the application of hydraulic and pneumatic system
- Build and interpret hydraulic and pneumatic circuits related to industrial applications
- Familiarize with logic controls and trouble shooting

DEPARTMENT OF CIVIL ENGINEERING

Academic Year 2016-17

Course Outcome

Title: Technical Training on “SOFTSKILLS AND TRAINING”

Objectives:

- 1.To improve communication and technical skills.
- 2.To improve leadership quality.
3. To improve emotional maturity and emotional health.

Description:

The training mainly focused on fine tuning the communication skills of students, Main topics covered were: Body language, Public speaking, Presentation skills, Interviewing skills, Numerical ability etc.,

Outcomes:

- 1.Resilience** – learning to keep going when things don't go according to plan, coping with the unfamiliar, managing disappointment and dealing with conflict
- 2.Teamwork** – learning to connect and work with others to achieve a set task
- 3.Leadership** – assessing the requirements of a task, identifying the strengths within the team, utilising the diverse skills of the group to achieve the set objective, awareness of risk/safety
- 4.Communication** – demonstrating clear briefing and listening skills, not being afraid to ask for help and support when necessary
- 5.Emotional maturity and emotional health** – learning to handle emotions including tolerance and behavioural responses, building positive friendships and bonding with peers and classmates, learning to show understanding and to demonstrate respect for the opinions, personal space and beliefs of others
- 6.Confidence and enthusiasm for learning** – developing self-motivation, raised aspirations and belief in one's own abilities, defining and committing to achieving one's goals

DEPARTMENT OF AUTOMOBILE ENGINEERING

Academic Year 2016-17

Report

Title: Technical Training on "CATIA V5"

Objective: To provide training on CATIA V5 modelling, design and development skill and prepare them to industry ready requirements.

Date: 27th FEB to 4th March 2017

Time: 9:00 AM to 4:00 pm

Location: The Oxford College of Engineering

Organized by: CADMAXX Solutions Pvt.Ltd

Audience: VII Sem Students of Automobile

Number of Students : 42

Speaker: Mr.Basappa V D and Mr.Uday Kuamr

Method Adopted: Theory sessions along with hands on sessions

Materials Used: CATIA V5 R16 Software

Description CATIA V5 Fundamentals should not be viewed as just a basic course, as together with the key CATIA skills that are on offer, the student will also pick up very important advice on engineering methodologies. The course includes a mixture of presentation and tutorial, enabling students to gain hands-on experience.

Students will be able:

- Create and Save various types of CATIA V5 documents
- Differentiate and switch between a selection of workbenches
- Perform various tasks concerning 3D Navigation and geometry selection
- Create and constrain sketches
- Describe the functional capabilities and general usage of:
 - Part Design, Generative Shape Design, Assembly Design
- To develop the competences needed to align technology solutions with business goals.
- To face the emerging challenges in the job market.

**CLOSURE REPORT
FOR
NETWORK SECURITY TRAINING CLASSES**

Organized by: Department of ISE

Conducted by: Ether Global Services Pvt Ltd

Duration of the course: 45hrs,[Theory-30 hrs & lab practice -15hrs]

Trainers Name: Mr. Sekhar Jyoti

Venue For Theory& Practical Session: The Oxford college of Engineering

Department of Information Science & Engineering, The Oxford college of Engineering has organized Network security Training classes for final year students of ISE. The training was conducted by Ether global Services Pvt Ltd, Bangalore from 5th March 2018 to 10th March 2018. A total of 47 students enrolled for this program (ISE -38 and ECE-08). Total duration of the course was 45hrs, which includes 15 hrs of lab practices and 30hrs of theory. This course has covered entire Network security Concepts. Pre assessment test was conducted on 5th March 2018 & post assessment test was conducted on 12th March 2018 for the enrolled students.

All the Network security theory and Lab practices classes were held at The Oxford College of Engineering from 9.00 am to 4.15pm dated from 5th March 2018 to 10th March 2018.

The Trainer was Mr. Sekhar Jyoti. He is qualified Cisco Certified Networking trainer and possess hands on expertise in technologies pertaining to Routers, switches, VOIP, LAN and have in-depth knowledge about theories and methods used in designing, development and delivering successful corporate training modules.

By doing this course the students are exposed to the following network security concepts:

- Basics of networking and security, how to perform Subnetting for a given IP address.
- Understanding of firewalls, Access control list and VPN problems.
- At the end of this course revision classes and mock test were conducted.

The above concepts was explained practically through Cisco Packet Tracer (Simulation Software)

Benefits of Network security Certificate:

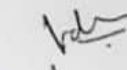

- Gives better prospects of occupying stable job positions in reputed IT companies
- Proved good skills and experience in installing, configuring and operating LAN, WAN and dial access services for networks.

Assessment tests: Both pre & post assessment tests were conducted and there is good progress & knowledge acquisition noticed.

Certificates: Then Network security course completion certificates will be issued on 15/3/18 afternoon 12:30pm

Feedback: Feedback was collected from students. Sample feedback forms are attached for conformation.

2017-18

**CLOSURE REPORT
FOR
INTERNET OF THINGS TRAINING CLASSES**

Organized by: Department Of ISE

Conducted by: Ether Global Services Pvt Ltd, Banglore.

Duration of the course: 45hrs[Theory-10 hrs & lab practice -35hrs]

Trainers Name: Mr.Anil

Venue for Theory & Practical Session: The Oxford college of Engineering

Department of Information Science & Engineering, The Oxford college of Engineering has organized IOT Training classes for final year students of ISE has conducted by Ether global Services Pvt Ltd, banglore from 5th March 2018 to 10th March 2018. A total of 56 students enrolled for this program (ISE - 36 and ECE - 20). Total duration of the course was 45hrs, which includes 35 hrs of lab practices and 10hrs of theory. Pre assessment test was also conducted on 5th March 2018 & post assessment test was also conducted on 12th March 2018 for the enrolled students.

All the IOT classes were held at The Oxford College of Engineering from 9.00 am to 4.15pm dated from 5th March 2018 to 10th March 2018.

The Trainer Mr. Anil was conducted all classes for students. Mr. Anil IOT trainer and possess hands on expertise in arduino, wifi, light sensors, temperature sensors, LED blinking and LCD display and have in-depth knowledge about theories and methods used in designing, development and delivering successful corporate training modules.

By doing this course the students are exposed to the following IOT concepts:

- Gain knowledge of low-cost technologies, connectivity, data and sensors.
- Understanding of architecture of arduino board, Access control to various sensors.
- Apply the knowledge of IOT to implement smart home, smart cities etc.

Benefits of IOT Certificate:

- To get good job opportunity.
- Proved good skills and experience in configuring and operating.

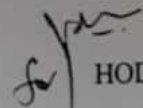

Assessment tests: Both pre & post assessment tests were conducted and there is good progress & knowledge acquisition noticed.

After completion of course ether Global Services Pvt Ltd provided 2 set of components (arduino board, light sensors, wifi connectors and multi-color wires).

Certificates: ~~Pre~~ IOT course completion certificates will be issued on 15/3/18 afternoon 12:30pm

Feedback: Feedback was collected from students. Sample feedback forms are attached for conformation.

Report of Technical Training

Title: Technical Training on “AUTOMATION (PLC & SCADA), DRIVES, LV SWITCHGEAR”

Objectives: To become familiar with this Industrial automation is the use of control devices such as PC/PLCs/PACs to control industrial processes and machinery by replacing as much as possible labor intervention and dangerous assembly operations with automated ones. In industrial control a wide number of process variables such as temperature, flow, pressure, distance, and liquid levels can be sensed simultaneously

Date: 5th Mar to 10th Mar 2018

Time: 9:00 AM to 4:00 pm

Location: The Oxford College of Engineering

Organized by: AXIS GLOBAL AUTOMATION GROUP OF COMPANIES

Audience: VIII Sem Students of Electrical and Electronics Engineering

Number of Students: 30

Speaker: Mr. Vinay Sai S, Mr. Raja Sekaran D, Mr. Dheeraj sharma, Mr. Ashwin raja

Method Adopted: Theory sessions along with hands on sessions

Materials Used: 2 PLC, 1 SCADA ,1 DRIVE

Description Programmable Logic Controller (PLC) is a digital computer interface used for the automation of various electro-mechanical processes in industries. The program is written on a computer and is downloaded to the PLC via cable. Supervisory Control and Data Acquisition (SCADA) is a control system architecture that uses computers, networked data communications and graphical user interfaces for high-level process supervisory management.

Report

Title: Technical Training on "Big Data and IOT"

Objective: To provide training on Big Data and IOT skill and prepare them to industry ready requirements.

Date: 25th February 2019 to 2nd March 2019

Time: 9:00 AM to 4:00 PM

Location: The Oxford College of Engineering

Organized by: AVV Aspire Solutions Pvt. Ltd.

Audience: 8th Sem Students of CSE (111)

Speaker: Mr. Nilesh Kumar Gupta and Ms. Mahira Banu

Method Adopted: Theory sessions along with hands on sessions

Materials Used: Cloudera, Vmplayer, Arduino, RIOT OS, and Raspbian

Description (only 10-15 lines): The Training was planned for the development of Big data and IoT skill for the students, which would help them in their career, placements and their final year project work. All the sessions were well organized and it was also fully practical based session. Students were also exposed to interview questionnaires and real life projects. They have been trained with the advanced tools for solving problems, projects and interview questions.

Outcome:

Students will be able

- To get a deeper knowledge of various Big Data frameworks
- To have Hands-on learning on Big data Analytics with Hadoop
- To work on projects related to banking, governmental sectors, e-commerce websites, etc
- Able to understand the application areas of IOT
- Explore the relationship between IoT, cloud computing, and big data
- Identify how IoT differs from traditional data collection systems

CYBER SECURITY TRAINING CLASSES**

Organized by: Department of ISE

Conducted by: AVV Aspire Solutions Pvt Ltd

Duration of the course: 40hrs.

Trainers Name: Mr. Ishaan Sharma

Venue For Theory& Practical Session: The Oxford college of Engineering

Department of Information Science & Engineering, The Oxford college of Engineering has organized Network security Training classes for final year students of ISE. The training was conducted by AVV Aspire Solutions Pvt Ltd, Bangalore from 25th February 2019 to 2nd March 2019. A total of 41 students enrolled for this program. Total duration of the course was 40hrs. This course has covered entire Cyber security Concepts.

All the Cyber security theory and Lab practices classes were held at The Oxford College of Engineering from 9.00 am to 4.15pm dated from 25th February 2019 to 2nd March 2019.

The Trainer was Mr. Ishaan Sharma. He is qualified Ethical Hacking & Computer Forensics trainer and possess hands on expertise and have in-depth knowledge about theories and methods used in designing, development and delivering successful corporate training modules.

By doing this course the students are exposed to the following Cyber security concepts:

- Basics of Cyber security AIC (Availability, Integrity, and Confidentiality).
- Understanding of different types of cyber attacks..
- At the end of this course revision classes and mock test were conducted.

Benefits of Cyber security Certificate:

- Gives better prospects of occupying stable job positions in reputed IT companies.
- Cyber security is vital for career roles such as penetration tester, cyber security analyst, network analyst, cybe rsecurity auditor, cyber security architect, forensics investigator, and many more.

Certificates: Then Cyber security course completion certificates will be issued for the students.

Feedback: Feedback was collected from students. Sample feedback forms are attached for conformation.

HOD-ISE

**CLOSURE REPORT
FOR
BIG DATA & IOT Training**

Organized by: Department Of ISE

Conducted by: AVV Aspire Solutions Pvt Ltd

Duration of the course:40hrs

Trainers Name: Nilesh Kumar Gupta

Venue For Theory & Practical Sessions :The Oxford college of Engineering-
ISE Seminar Hall

COURSE OVERVIEW

Department of Information Science & Engineering, The Oxford college of Engineering has organized BIG DATA & IOT Training classes for final year students of ISE has conducted by AVV Aspire Solutions Pvt Ltd, from 25th Feb 2019 to 2nd March 2019 .A total of 33 students enrolled for this program . Total duration of the course was 40hrs.. Post assessment test was also conducted at the end of training for all the students.

All the CCNA theory classes & lab practices were held at ISE Seminar Hall, The Oxford College of Engineering from 9.00 am to 4.15 pm dated from 25th Feb 2019 to 2nd March 2019.

The trainer Mr. Nilesh Kumar Gupta was conducted all classes for students. Mr. Nilesh Kumar Gupta has done many projects in data analytics. He also worked in many MNC as project head . He has good knowledge in Bigdata & Data Analytics

All topics were explained well with proper examples. Also the classes were interactive.

Additional benefits given to students apart from the course:

- Python software was shared with the students
- PPT's & PDF of course contents were shared with the students
- Softcopy of Lab Practical Materials were the students.

By doing this course the students got an understanding of the following key technologies and concepts:

At the end of this course revision classes and mock test were conducted.

After completing these course students were advised to write CCNA exam.

This training can help to land a job in data analytics & IOT

Assessment tests: Post assessment tests were conducted and there is good progress & knowledge acquisition noticed.

Certificates: Then Bigdata & IOT course completion certificates were issued to all the students .

Feedback: Feedback was collected from students & also from the trainers.

HOD-ISE

Soft Skills and Aptitude

Training

03/10/2018 to 11/10/2018.

Academic Year - 2018-2019

DAY 1

Morning session:

The very first day morning session was taken by **MANISHA** ma'am. She was dealing about the English concepts, the topics covered are Grammar And Closest Test, how good we can communicate, what to be used in resume part, what to describe as strength, and what not to be, what to be used as our weakness when asked by the interviewer. Later she did some concepts related to English from the book.

Then she made us to do activate. It's like she gives some 10 topic like hard working, goal oriented, etc., And we need show through the pictorial representation of those qualities.

Afternoon session:

Afternoon session us done by **NAGARAJ** sir. He was dealing about GD (group discussion) and Interview. How to start a discussion? How to involve into the group discussion even though we do not know about the topic at all? He gave us a

lot of tip regarding both the concepts, made us understand basically what the concepts mean.

He also mention that what are main qualities which they expect from us. They are, called as "ASK"

- 1) Attitude (A)
- 2) Skill(S)
- 3) Knowledge (K)

Later he had made us perform a group decision among different set of peoples with different concept and said about do's and don'ts in the GD round an as well as interview section too.

DAY2

Morning session:

The session was taken up by **Ramakrishna** sir. He was dealing about the topic in aptitude that is Ratio, Proportions And Ages. He was guide us how to perform with logics and tricks that can save our time in exam point of view. He made to do some problem of his own, later made to know the exercise from book. Then gave us some tips regarding life. These concepts are given 4th most priority in aptitude during our placements.

Afternoon session:

The session was organized by Neeraj sir, he was handling Letter Series And Number Series in aptitude. This session was so interesting and felt it went on so soon, as we are so much involved in it. He gave us different tip on both the concepts and hints to solve quick during test. He made us to do the exercise of letter and then an activate round was conducted and continued with number series an then again an activate and gave us some suggestions for our career and goals.

DAY 3

Morning session:

Third day was handled by **Bhargavi ma'am**. She did Probability, Partnership. Her concepts involves about coins, cards, dice's, etc.,. She said a very easy methods and tips in solving those. About partnership she did different ideals based on simple, compound, active and sleeping partner concepts, which play a very important role in our aptitude. She made us solve problems from seven sense book as well as she gave some problems out of the book also to solve. This session was very useful and she made us do activities related to the topic also it was quite interesting.

Afternoon session:

Kavitha ma'am took this session it was all about how we deal about Subject Verbs Arrangements. It's basically an communication as well as team work role. She made very one to introduce themselves in a different matter than usual way. Later a activity which deals about how we can produce our concepts and ideas in a group and how we come up in introducing a new product into market. It help everyone to get rid of stage fear and helps in speaking skills also i.e., how to convince others with our topic and make ourselves better in a group. It's was a very interactive session. it helps everyone to share their views of ideas.

DAY 4

Morning session:

Nagesh sir is allotted for 1st session day four. He was dealing about Communication And Interactive Session. He gave tips in introducing ourselves in an placements as we as anywhere, what to be said ,what not to be was discussed. Later he divided us into groups and asked us to come up with a

creative way of approaching with the a spot concepts and presenting in a better way .It was helped us in gaining courage to come over and speak.

Evening session:

Keithi Shetty ma'am was very energetic and she handled blood relation topic from aptitude. she also gave us easy ways to solve in a very short span of time during any tests. she explain different ways of methods which can appear in any aptitude exams. she gave many examples and problems to solve and done some activities to related to concepts.

LAY 5

Morning session:

On day 5 we have **Raghunadhadan.M** sir ,who was handling topic of English like arrangements of word, one word statements. Through this session we come across very new word for our daily activities. It was one among interactive session

Evening session:

Ahana ma'am was held for this session was cool and was very kind hearted. She was handling calendar topic which is not much related to math, basic math is enough to solve these. This session also went so soon we felt as very one were so involved in doing problem by competing with each other. she was gave tips and different ways they may ask the question and easy ways to solve those, this is why we were so deep involved in doing those and a activity also done related to subject.

DAY 6

Morning session:

Avinash sir took this session ,he was handling permutation and combinations concepts. basically it was bit tough topic for everyone to understanding work on those but, this sir made it easy to solve made us interested in this topic also. Many problems were also with different possible ways. It was also quit interesting day.

Evening session:

this session was held by Ahana ma'am only. we have a creative thinking, group skills, team work, coordination, involvement of everyone etc., handled in this session. She gave a task for 30min which involves all the above mention qualities taking place and finally the output is evaluate . And an activities with involves word build and story build means how innovative our thoughts can be knowing about this activities.

Over a series of sessions were so important and very useful for us at this moment. I very much enjoyed the session which was very impressive and day by day interest of learning new concepts increased in us.

Thank you for these sessions which are given at right time for us

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

SOFT SKILLS TRAINING (IV Sem) REPORT 2019 ,
HELD ON MARCH 14th - 16th

Professor & HOD of EAC Engineering
The Oxford College of Engineering
Bommanahalli, Hosur Road, Bengaluru - 560 068.

14th MARCH 2019

MORNING SESSION

TOPIC: Negotiation skills

Trainer: Mr. Ankith

Negotiation requires the two parties to come together with an agreement.

This session included the topics that a good Negotiator requires like the way he tries to communicate with the other person, the way he convinces them and many more. This session also had many fun activities that was related to that particular session and we had lot of fun. After the session there was short duration break for us to get prepare for the next session. The 3-4 activities was done with groups and also individual throughout the session. The activities main aim is to eliminate the stage fear from the students. One of the activity was about the interview.

14th MARCH 2019

AFTERNOON SESSION

TOPIC: Assertive Communication

Trainer: Mr. Naveen Gowda

Working with people, not against them

Being assertive means being able to stand up for your own or other people's rights in a calm and positive way, without being aggressive, or passively accepting wrong. By learning this skill actually increase appropriate use of our behavior. He gave us a situation and we started working on it, that situation which bring aggressive in us. It helps to overcome come the difficult situation. By learning how to talk will enables us to respect everyone. This is one of the skills which we should understand it carefully.

"Let's take an example where you have to give a presentation but one of our team members has turned up twenty minutes late". We get angry and we will be so rude on our friend, what assertive communication teaches us to handle the situation in a polite way. Instead being rude we can tell them we were supposed to start presentation at 11:30, now it's 11.50.

The session was good, he did one activity to understand about the assertive communication. He made u solve puzzles.

15th MARCH 2019

MORNING SESSION

TOPIC: Presentation skills

Trainer: Ms. Bhargavi. P.

Presenting information clearly and effectively is a key skill to get your message or opinion across and, today presentation skills are required in almost every field. She taught us the way we can give our presentation it might be the way we talk, body language and many more. We naturally feel nervous before making a presentation to overcome that she gave us a task to make presentation. We came up with an idea of presenting a product or advertising about that. She judged us and directed us the ways in which we can improve our presentation skills. Finally, how we present it in an effective way then surely it will affect the customer in a positive way or else in a negative way. The main purpose of this skill is an effective presentation can influence and inspire the team.

We really enjoyed the session and made us to understand the things better, how to present the information in front of others. She taught us the steps of presentation. The presentation was done in small groups, plus there were 2-3 activities that was done throughout the session.

15th MARCH 2019

AFTERNOON SESSION

TOPIC: Skill Development

Trainer: Mr. Basil

Skill development is used for exchange of real information, evidence of their own ability and important confidence. The skill development includes listening skills, speaking skills, reading skills and writing skills. Listening skills is language skill which most of people find the difficult. For speaking language is tool for communication. Reading improves the language vocabulary, spelling, grammar and many more. Writing helps us to understand the text and write compositions.

In this session we have learnt about the importance of communication skills with 2-3 activities. He taught us about the importance of learning skills, speaking skills, listening skills and writing skills.

Time

16th MARCH 2019
MORNING SESSION

TOPIC: Team Building

Trainer: Ms. Ankitha

Team building is the collective term for various types of activities used to enhance social relations and define roles within teams. Team building skills include the stages like forming, storming, norming and performing.

In this session the activities were done in group, so that we can understand need of the team. From that we understood in team there should be unity, mingling with other teammates, listening to other people in the team, shared our objectives, everyone participation should be equal, togetherness, helping each other and many more. We understood the success of the team is more important than individual success. There were 3-4 activities conducted in this session.

We like to thank our PRINCIPAL **Dr. Praveena Gowda** for organizing this wonderful skill training program for us. Secondly, I like to thank our HOD mam **Mrs. Manju Devi** for giving us a wonderful opportunity to attend training. Thirdly, I like to thank our lecturers for encouraging us to attend this training and lastly, I like to thank those trainers for training us and giving such a wonderful advice, sharing their knowledge to us and guiding to the right direction. I like to thank you all once again.

Report on

**“TECHNICAL TRAINING FOR PYTHON,
MACHINE LEARNING AND SQL”**

BY

PALLE TECHNOLOGIES”

25th FEBRUARY 2019

MORNING SESSION

The technical training started off with learning Python. Firstly, we started with the basics of python. Then moved on to learn about how to define a variable, how to enter data into a variable and also how to print the data was shown executed in the python software. Then we moved onto the basic Data types and then about the Advanced Data types in Python.

All the above Data types were learnt in detail including the syntaxes and were checked in the pre-installed Python software with some basic examples.

This session was given by the CEO of Palle Technologies,

Mr.Lokanatha Palle

AFTERNOON SESSION

During this session we studied about the conditional statements, Operators and loops in python. All these were learnt in detail with many examples and were checked in python software. Several programs of python were discussed and made familiar with debugging the programs using Breakpoints.

26th FEBRUARY 2019

MORNING SESSION

The second day started off with learning the functions involved in Python. Under the functions the below topics were discussed-

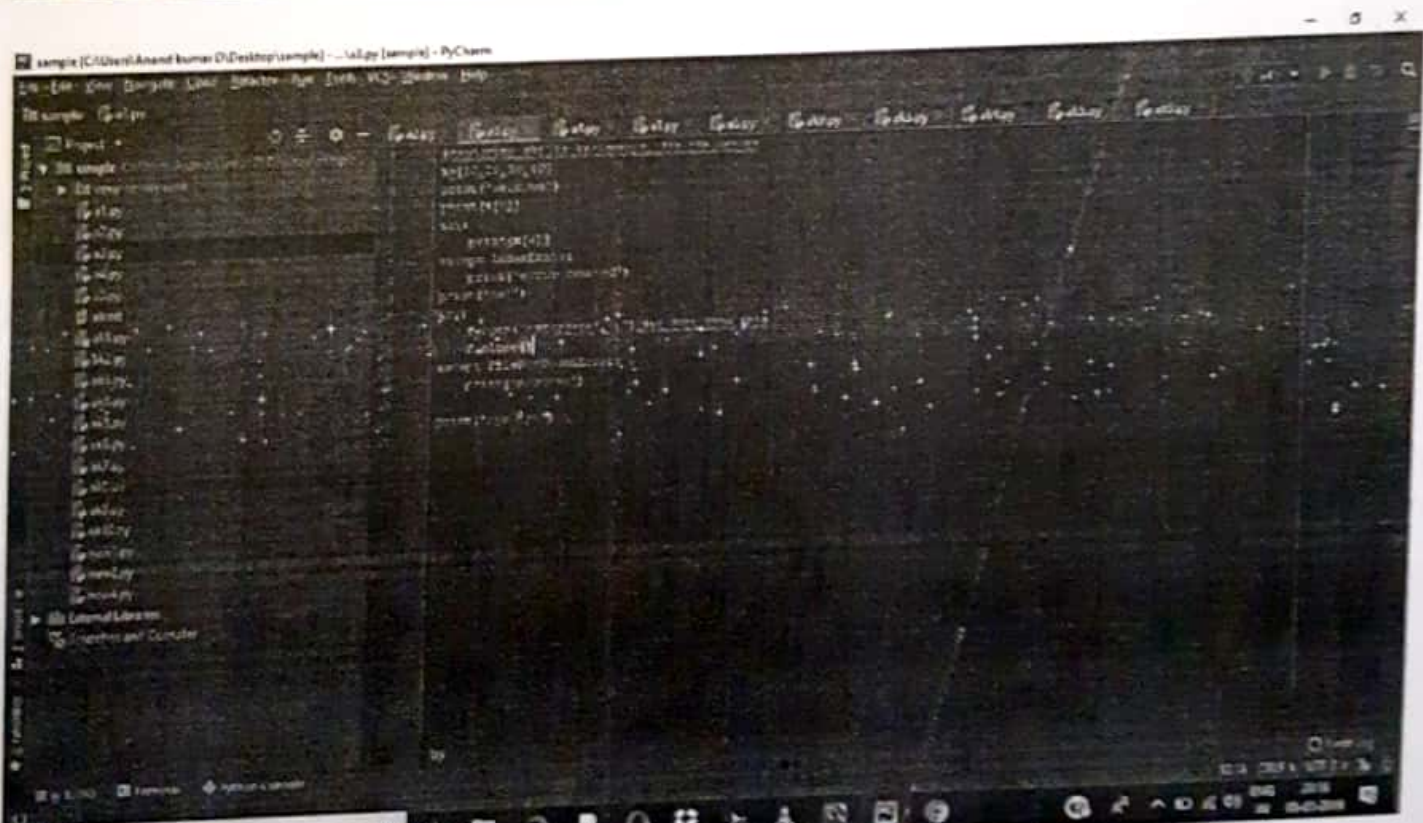

- function definition and method call
- returning values from methods
- types of function/method
- types of parameters

All the above were discussed in detail with their syntaxes and example programs were practiced.

AFTERNOON SESSION

We worked on the programs that are frequently asked in the technical interview round during interviews including how to debug them using breakpoints. After that the different types of variables of python were discussed with examples. Then we moved onto the classes in python and how they were called.

27th FEBRUARY 2019

MORNING SESSION

The day started with learning the object oriented programming (OOP) concept of python. The definitions of class and objects were discussed. Then how a class is created, the rules for creation of a class and how class is called using methods were discussed and tested in python software. Later, we discussed about the memory involved in classes. Then, the local and instance variables were compared. We learnt about inheritance in python and types of the same. We further studied about method over-riding and over-loading.

This session was taken by
Mr. Satish Reddy
From Palle Technologies

28th FEBRUARY 2019

MORNING SESSION

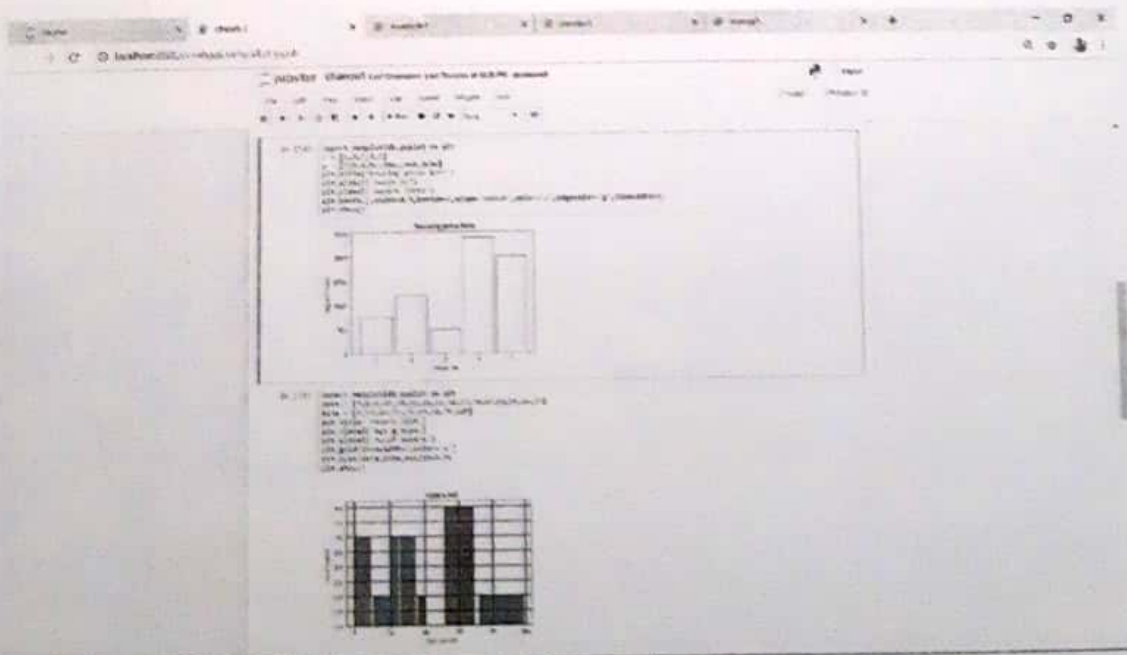

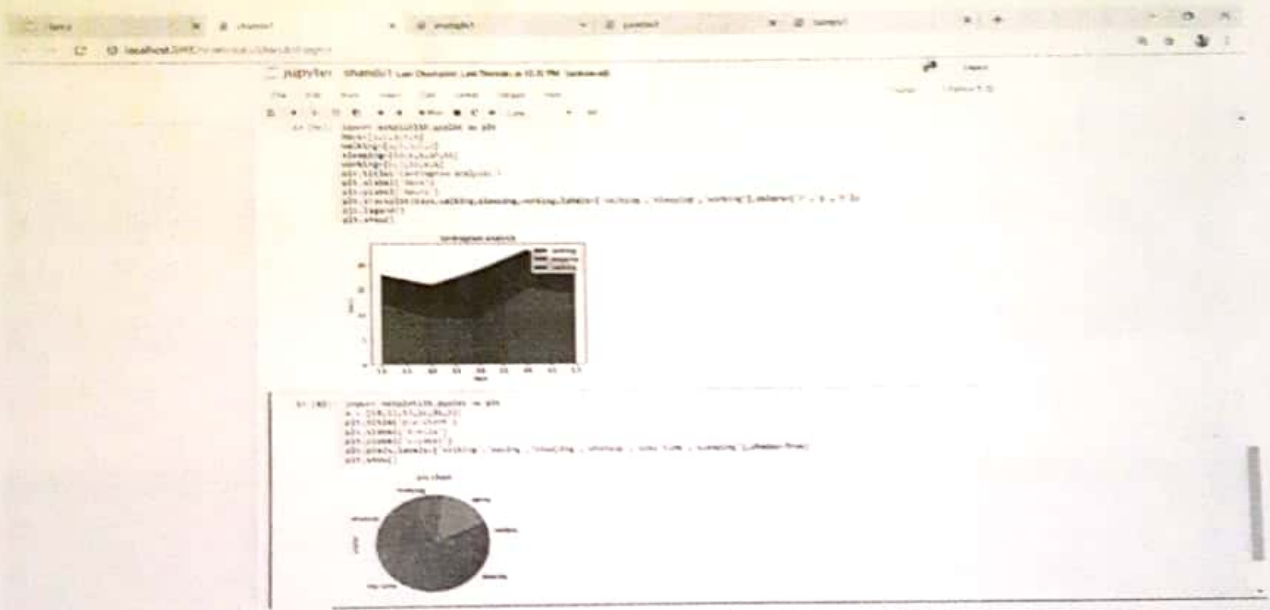

After learning Python we progressed onto Machine Learning (ML). The basic definition of machine learning, what types of problem it solves and how it solves problems were discussed in detail with real time examples. Then we moved onto the Machine learning process. The process includes-

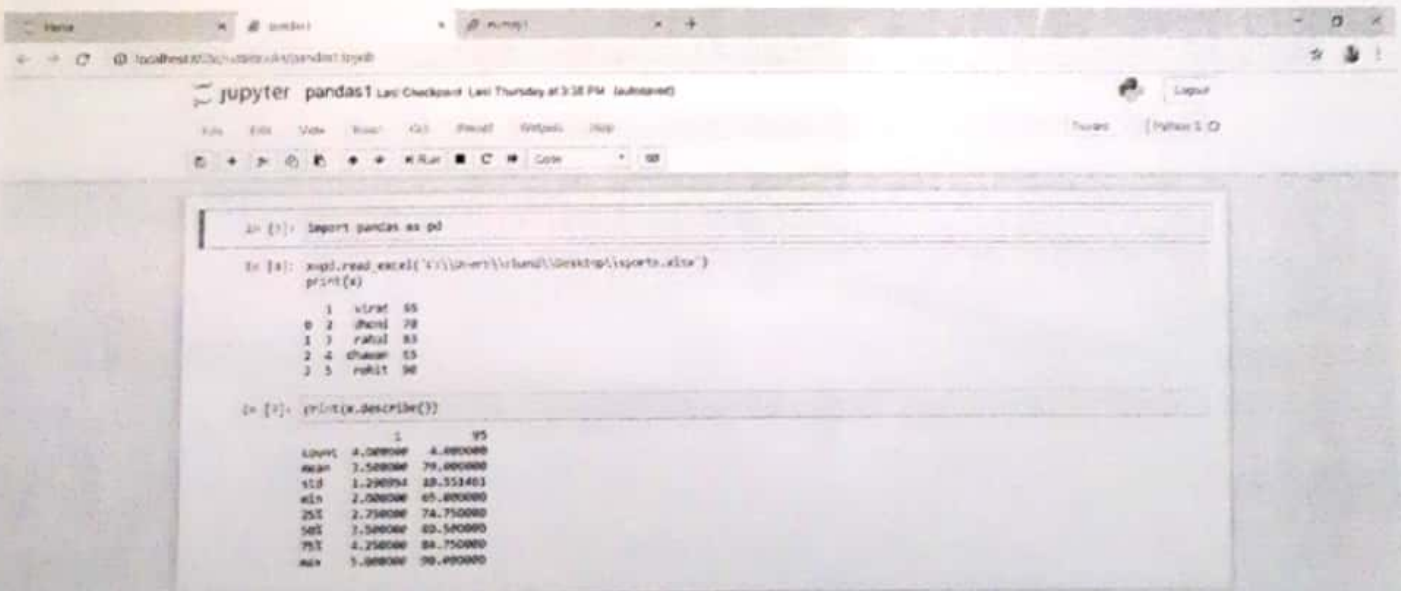

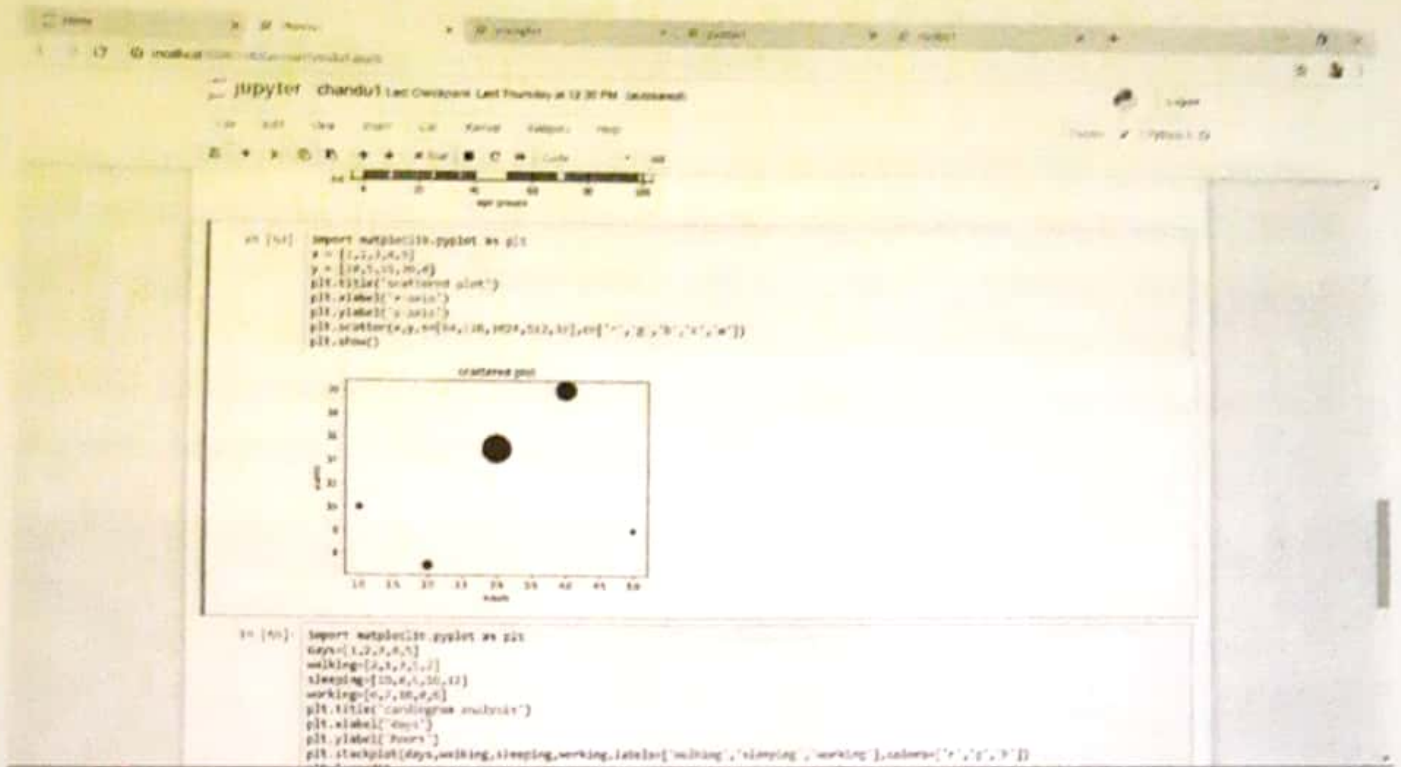

- Get data
- Clean, prepare and manipulate data
- Train Model
- Test Data
- Improvisation

AFTERNOON SESSION

During this session we worked on the Machine learning processes in detail. All the steps included in Machine learning process that use specific software were introduced. Those are Matplotlib, Numpy, Scipy, Pandas and Jupyter Notebook. Firstly we started with matplotlib where we learnt how to represent the given data by plotting them in different forms like histogram, pie charts etc. Then moved onto numpy where we learnt how to create arrays and printing of arrays

1st MARCH 2019

MORNING SESSION

Today's session was about MYSQL. Firstly, we started off with all the data types in MYSQL and then moved onto Tables. How tables are created with the proper syntax and how data is added to it were taught in detail. Secondly, we were taught about the various types of Constraints available in MYSQL. We worked on examples using different constraints in the MYSQL software which was provided by the technical training team. Then Normalization of the tables was taught in order to reduce duplication.

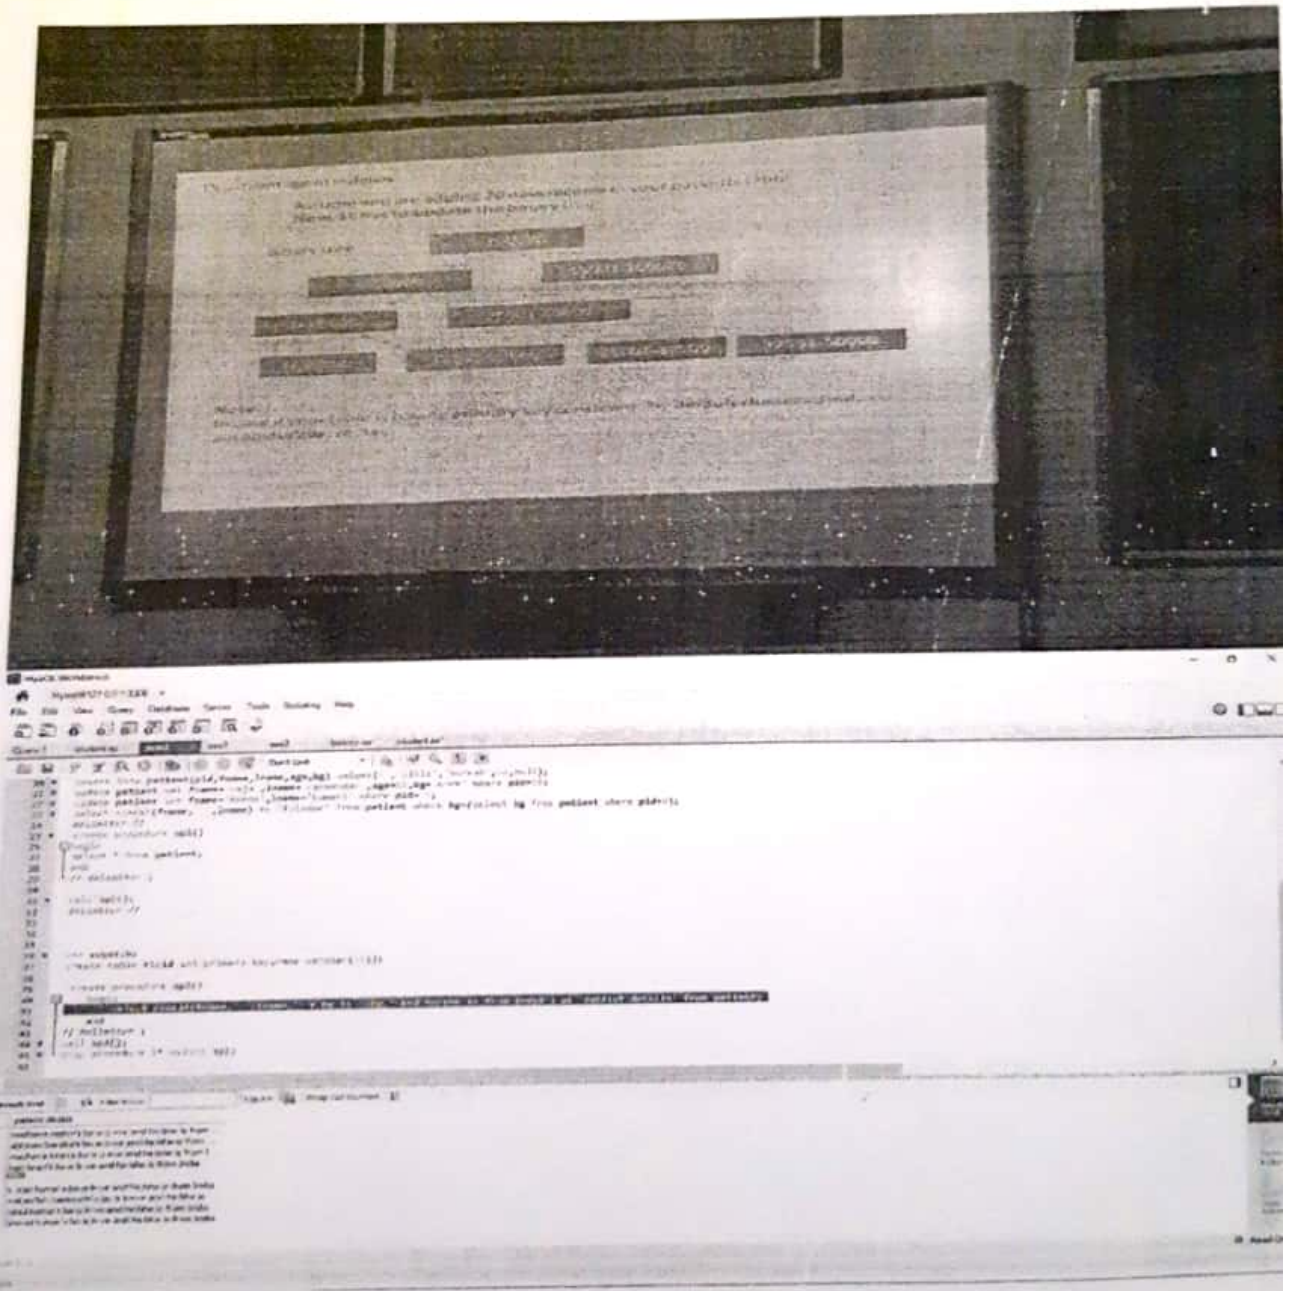

This session was taken by
Mrs. Vidhya B.P
From Palle Technologies

2nd MARCH 2019

The last day of the technical training started off with learning about order by clause in MYSQL and the syntax for the same. Then learnt about Generic update, insert and delete with their syntaxes and examples of the same was executed using MYSQL software. Then we moved onto sub queries and different types of sub queries. Later, we moved onto joins and types of joins, which were explained in detail with their respective syntaxes. Lastly, we were taught about procedures in MYSQL including creation of a procedure and calling a stored procedure and also indexes. The disadvantages of indexed was also discussed. The technical training ended on this day.

FEEDBACK

This technical training was really helpful and we are looking forward to get placed in IT companies as programmers and developers. The technical training team was extremely experienced and thorough with the concepts. We really are happy with the technical training. They were calm and ready to clear our doubts. The training team has provided us with study material for python, machine learning and SQL. They have also provided with videos for learning java and SQL in detail.

If this training was given before our final year it would have helped a lot nevertheless it will really help us now find our desired job in IT industry.

Academic Year 2018-19

Report of Technical Training

Title: Technical Training on “AUTOMATION (PLC & SCADA), DRIVES, LV SWITCHGEAR”

Objectives: To become familiar with this Industrial automation is the use of control devices such as PC/PLCs/PACs to control industrial processes and machinery by replacing as much as possible labor intervention and dangerous assembly operations with automated ones. In industrial control a wide number of process variables such as temperature, flow, pressure, distance, and liquid levels can be sensed simultaneously

Date: 18th Feb to 23rd Feb 2019

Time: 9:00 AM to 4:00 pm

Location: The Oxford College of Engineering

Organized by: SIMENS LTD

Audience: VIII Sem Students of Electrical and Electronics Engineering

Number of Students: 94

Speaker: Mr. Vinay Sai S, Mr. Raja Sekaran D

Method Adopted: Theory sessions along with hands on sessions

Materials Used: 2 PLC, 1 SCADA ,1 DRIVE

Description Programmable Logic Controller (PLC) is a digital computer interface used for the automation of various electro-mechanical processes in industries. The program is written on a computer and is downloaded to the PLC via cable. Supervisory Control and Data Acquisition (SCADA) is a control system architecture that uses computers, networked data communications and graphical user interfaces for high-level process supervisory management.

Academic Year 2018-19

Course Outcome

Title: Technical Training on “SOFTSKILLS AND TRAINING”

Objectives:

- 1.To improve communication and technical skills.
- 2.To improve leadership quality.
3. To improve emotional maturity and emotional health.

Description: The training mainly focused on fine tuning the communication skills of students, Main topics covered were: Body language, Public speaking, Presentation skills, Interviewing skills, Numerical ability etc.,

Course Outcomes:

- 1.Resilience** – learning to keep going when things don't go according to plan, coping with the unfamiliar, managing disappointment and dealing with conflict
- 2.Teamwork** – learning to connect and work with others to achieve a set task
- 3.Leadership** – assessing the requirements of a task, identifying the strengths within the team, utilising the diverse skills of the group to achieve the set objective, awareness of risk/safety
- 4.Communication** – demonstrating clear briefing and listening skills, not being afraid to ask for help and support when necessary
- 5.Emotional maturity and emotional health** – learning to handle emotions including tolerance and behavioural responses, building positive friendships and bonding with peers and classmates, learning to show understanding and to demonstrate respect for the opinions, personal space and beliefs of others
- 6.Confidence and enthusiasm for learning** – developing self-motivation, raised aspirations and belief in one's own abilities, defining and committing to achieving one's goals

DEPARTMENT OF AUTOMOBILE ENGINEERING

Academic Year 2018-19

Report

Title: Technical Training on “FEA PACKAGES –Hyper mesh Software”

Objectives: HyperMesh software is the most popular and leading, multi-disciplinary finite element pre-processor which is used to manage the generation of largest and most complex models, initiating from import of a CAD geometry and ending with ready-to-run solver file.

Date: 25th FEB to 01st MAR 2019

Time: 9:00 AM to 4:00 pm

Location: The Oxford College of Engineering

Organized by: Royota Engineering & Solutions

Audience: VII Sem Students of Automobile

Number of Students : 33

Speaker: Mr.ShankarPrakash

Method Adopted: Theory sessions along with hands on sessions

Materials Used: HyperMesh Software

Description: HyperMesh software is the most popular and leading, multi-disciplinary finite element pre-processor which is used to manage the generation of largest and most complex models, initiating from import of a CAD geometry and ending with ready to run solver file.

This is a standard tool which supports users to develop better and more innovative products in a shortened time.

Outcomes:

- Student will learn about Finite Element Analysis (FEA).
- Student will know about Shell, Tetra, and HyperMeshing.
- Student will be able to create hexa and penta mesh.
- Student will be able to do assemblies: Welding and Swapping Parts.
- Student will learn about Topography and Topology
- Student will learn about Thermal, Static and Normal Mode analysis.
- Student will know to prepare models for analysis and geometry for meshing.
- Student will know to define manufacturing constraints.
- Student will know to do 2D and 3D shape optimization and 1D and 2D size optimization.

Technical Training Python, Data Science, Machine Learning - 8 days training

The Python, Data Science, Machine Learning - 8 days training Program was held from 18.2.19 to 26.2.19. The training was very information to the students was very information to the students. It also covered all the important topics related to Python, Data Science, Machine Learning - 8 days training program. We thought they could have included more of practical sessions on all the topics and some more time.

We appreciate the work and training given to the students, it will help them to build a better future, if they given their extra time in order to learn Machine Learning with Python Training Program.

Report

Title: Technical Training on “C, C++, Java, Python with Machine Learning and Artificial Intelligence”

Objective: To provide training on C, C++, Java, Python with Machine Learning and Artificial Intelligence skill and prepare them to industry ready requirements.

Date: 04th November to 09th November 2019

Time: 9:00 AM to 4:00 PM

Location: The Oxford College of Engineering

Organized by: IIHT, Bangalore

Audience: 8th Sem Students of CSE (93)

Speaker: Mr. Suramya Biswas and A Jaikumar

Method Adopted: Theory sessions along with hands on sessions

Materials Used: JDK Packages, Python Packages

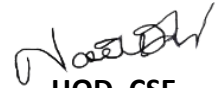

Description (only 10-15 lines): The Training was planned for the C, C++, Java, Python with Machine Learning and Artificial Intelligence skill development for the students which would help them in their career, placements and their final year project work. All the sessions were well organized and it was also fully practical based session. Students were also exposed to interview questionnaires and real life projects. They have been trained with the advanced tools for solving problems, projects and interview questions.

Outcome:

Students will be able

- Develop error-free, well-documented Java programs; develop and test Java network, search engine, and web framework programs.
- Appreciate the breadth & depth of ML applications and use cases in real-world scenarios.

- Import and wrangle data using Python libraries and divide them into training and test datasets.
- Data preprocessing techniques, Univariate and Multivariate analysis, Missing values and outlier treatment etc.
- AI basics and build on skills aligned with current industry requirements, to get you ready for AI career.

HOD, CSE

IIHT Oxford College - Course Content	
Course Title	CORE & ADVANCE JAVA
Days/Hours	6 Days (7 Hrs x 6 Days = 42 Hrs)
Start Date	04-11-2019 - Monday
End Date	09-11-2019 - Saturday
Target Batch	For BE- CSE/ISE & MCA students

Detailed Syllabus				
Days	Topics	Sub Topics	Hours	Page Nos.
Day 1	Programming Fundamentals with C	Structure - C program, printf, scanf, Variables in C, Data Types in C, Keywords in C, C Operators, C-Escape Sequence.	1	
	Conditional statements and loops	Conditional Statements - if-else, switch. Loops - Do-while loop, While loop, For loop, Break, Continue, Goto & Type Casting.	2	
	Strings, Arrays and Pointer, Functions	Strings in C , Functions with Strings: gets() & puts(), String Functions: strlen(), strcpy(), strcat(), strcmp(), strcmp(), strstr(), strstr(), Arrays: 1-D Array, 2-D Array, Array to Function, Pointers: Pointer to Pointer, Pointer Arithmetic	3	
Day 2	Operators	Operators in C: Unary Operator, Arithmetic Operator, Shift Operator, Relational Operator, Bitwise Operator, Logical Operator, Ternary Operator and Assignment Operator.	2	
	Structures and Union	Structures: Array of Structures, Nested Structure, Union		
	File Handling With C	File Handling: fprintf() fscanf(), fputc() fgetc(), fputs() fgets(), fseek(), rewind(), ftell()	1	
	Memory Allocation	malloc(), calloc(), free() and realloc()		
	Object Oriented Program with JAVA	OOPs Concepts - Class & Objects, Java Program Structure. ECLIPSE Development Eco System	3	
Day 3	UI Interface	UI: Introduction to Web & Rapid & Single Page Applications, HTML5	2	
		HTML Tags, CSS/JS, Authentication & Authorisation	1	
		Validations GIT Profile Eclipse IDE, Project Initialisation, SRS: Requirement Gathering, JSP/Servlet/ DB, SQL	3	
Day 4	Frameworks - Spring Boot, Hibernate & Maven	Frameworks - Spring Boot, Maven dependency, ProjectSB, Project Wizard, Spring Initializer, Spring Boot CLI, Spring Boot Example, SB Annotations, Spring Boot, DMSpring Boot, SpringProperties, Spring Boot Starters, Spring Boot Actuator.	2	

		Hibernate - Overview, Hibernate and JDBC, Development Process Overview, Creating Hibernate Configuration file, Annotations, Querying Objects with Hibernate	3	
		Maven - Overview, Environment Setup, POM Build Life Cycle, Build Profiles, Repositories, Plug-ins, Creating Project, Build & Test Project	1	
Day 5	Integration	Integration - Spring Boot + Hybernate + Maven	2	
		CRUD operation	2	
		Web APP : System Requirements & Specifications, App Development	2	
Day 6	Overview - Python with ML & AI	Python : Introduction to Python Eco System Python with ML : Machine Learning Systems, Unsupervised & Supervised Learning Techniques, Types of Algorithms, Programming with Python Python with AI : Pandas, NumPy	6	
	Total Hours		36	
Placement - 30% of placement to the trained students

CLOSURE REPORT

Technical training on programming languages(C , C++, JAVA HTML, Python)and advanced concepts(ML and AI)

Organized by: Department Of ISE

Conducted by: IIHT

Duration of the course: 42 hrs

Trainers Name: Mr. Nagesh, Mr. Goutham, Mr. Veera babu and Mr Jayakumar

Venue For Theory & Practical Sessions : The Oxford college of Engineering- ISE Seminar Hall(405) and Class room (409)

COURSE OVERVIEW

The Oxford college of Engineering has organized Technical Training on programming languages(C , C++, JAVA HTML, Python) and advanced concepts(ML and AI) for final year students of ISE was conducted by IIHT , from 4th Nov 2019 to 11th Nov 2019 .A total of 97 students enrolled for this program . Total duration of the course was 42 hrs..

All the theory classes & lab practices were held at ISE Seminar Hall and N409 class room, The Oxford College of Engineering from 9.00 am to 4.15 pm dated from 4th Nov 2019 to 11th Nov 2019(6 days) .

The trainers Mr. Nagesh and Mr Jayakumar conducted C , C++, JAVA and HTML programing concepts to all students. The trainer Mr.Veera babu and Mr. Goutham conducted python programming, machine learning and AI concepts to all students.

All the trainers have good knowledge in all the programming concepts. All topics were explained well with examples and the classes were interactive. The trainers discussed possible interview questions of every topic and also gave interview tips . Soft copy(PDF) and hardcopy of course contents were shared with the students

By doing this course the students got an understanding of all the programming concepts.

Certificates: Course completion certificates will be issued to all the students .

Feedback: Feedback was collected from students and HOD

Students feedback: Students were satisfied with course content and the way the training sessions were conducted.

HOD feedback: The trainers discussed the interview questions with the students which will help the students for their placements .Overall the training was good for our final year students .

Title: Technical Training on “Revit Software”

Objectives:

- 1.To create custom programme that fill the technical requirement gap.
- 2.Up to date training content offering the latest knowledge at subsidized cost.
- 3.Courseware specially prepare for institution training. training and certification partnering with engineering colleges.
- 4.To enhance employability skill development programs.

Description: The training programme covered the key parameters which focused on the understanding of Autodesk Revit Software, common mistakes made and how to avoid them, precautions to take, alternate solutions to common technical issues raised.

Course Outcomes:

- 1.Use their capacity of vision to create building model by using Autodesk Revit Software.
- 2.Creating a project that includes name and save the project file, zoom to a view, rename levels, create levels in the building.
- 3.Understanding various construction drawings which includes different types of walls, windows, roof, floors, stairs and modifying the roofs.

THE OXFORD COLLEGE OF ENG
DEPARTMENT OF MCA

Technical Training Report conducted from 4th to 11th November 2019

Technical Training was conducted from 4th to 11th November 2019 (6 days) by IHT, Bangalore for 3rd sem (pre-final) MCA students. It was conducted in 6th floor, new building MCA lab1(room no. N601) and Class room(room no. N617).

Technical training sessions

The session was taken by the following trainers on mentioned topics:

S no	Date	Trainer(R-N602)	Trainer(R-N617)	Topic
1	4/11/19	Rakesh Kumar Shrivastava	Md Mukhtar	Programming with C
2	5/11/19	Rakesh Kumar Shrivastava	Md Mukhtar	OOPs concepts with Java
3	6/11/19	Rakesh Kumar Shrivastava	Reni	UI interface-HTML5, CSS, Servlets, JSP
4	7/11/19	Rakesh Kumar Shrivastava	Reni	Frameworks-Spring, Hibernate, Maven
5	8/11/19	Rakesh Kumar Shrivastava	Reni	Integration, CRUD operation
6	11/11/19	Fazeel	Sharanya	Python with ML and AI

Feedback by Students: Only overview of topics were given as too many topics were covered so not able to learn indepth any subject, ultimately we are jack of all master of none.

Feedback by HOD:

1. Same trainer was teaching from morning to evening.
2. Practical exposure was less.
3. Notes must be given well in advance so that students can understand better.
4. This could have been spread across the semester weekly 2 hrs per week, it would have been more effective.
5. Trainer has taken mobile no and email-ids of the student which they may use it for further business.

Report

Title: Add-on certificate program on "Concept of Java"

Objectives: To improve the coding skills and to understand the concepts of Java OOPS concepts, Java is a programming language and Computing platform. Java is high level, class based object oriented. That is designed to have few implementations. the syntax of Java is similar to C and C++

Date: 22nd may 2021 - 24th may 2021

Organised by: ECE department apartment, The oxford college of Engineering
Audience: 5th semester students

Mode : Virtual mode

Speaker: Mrs. Ashwini, Assistant Professor, CSE department, BMS Institute of technology and management , Bangalore:

Description: The speaker gave the information about

OOPS concept, Data abstraction, Encapsulation, Inheritance, Polymorphism

Basic Java constructs like loops and data types

String handling

Collection framework

Multithreading

Exceptional handling

Generics

Synchronization

Popular Java IDE tools: Eclipse, Net beans, IntelliJ IDEA, Blue J, J Developer,
Dr Java, J creator

Tool: Eclipse, Net beans

Outcomes:

Students understood the coding skills and the concepts of Java, OOPS concepts, programming and Computing by using Java . Class based object oriented programs with few implementations and the syntax of Java. They understood the differences between Java and C++ and Java applications.

DEPARTMENT OF ELECTRONICS & COMMUNICATION ENGINEERING

Academic Year 2020-21

Report

Title: Add-On Certificate Program on "NANO PHOTONICS"

Objectives: Nanotechnology is the branch of Technology. It deals with the study of extremely small things and can be used across all the other science fields, such as chemistry, Biology, physics, materials science, and Engineering.

Date: 22nd February to 26th February 2021 Time: 9:00 AM to 5:00 pm

Location: The Oxford College of Engineering

Organized by: The Oxford College of Engineering

Speakers: **Dr. PreethaSharan**, Prof. Dept. of ECE, TOCE, Bengaluru on 22nd Feb 2021

Mr. Deepak, REVA University, Bengaluru. On 23rd Feb 2021

Ms. Archana Yadav, Asst. Prof. Dept. of ECE, Integral University, Lucknow on 24th Feb 2021

Ms. Suchandana Mishra Research Scholar, Dayanand Sagar University, Bengaluru on 25th Feb 2021

Mr. Anup M. Upadhyaya, Asst. Prof. Mechanical Dept. TOCE, Bengaluru

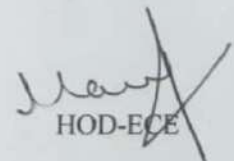

Method Adopted: Theory Sessions along with Hands on Session

Materials Used: MEEP TOOL, R – Soft, FBG Simulation Software, MPB Software

Description: Nanotechnology operates on atoms and molecules on the nano-meter scale, and by controlling the arrays and structure of substances, it exploits the unique characteristics of nano-size particles to create new, excellent characteristics of substances. Nanotechnology is a multidisciplinary field of research and stretches over fields like materials science, mechanics,

sometimes make it **difficult** to separate it from near by sciences. **Nanotechnology** is being used in developing countries to help treat disease and prevent health issues. The umbrella term for this kind of **nanotechnology** is Nano-medicine. **Nanotechnology** is also being applied to or developed for application to a variety of industrial and purification processes.

Outcomes: Nanotechnology has direct beneficial applications for medicine and the environment, but like all technologies it may have unintended effects that can adversely impact the environment, both within the human body and within the natural ecosystem. Materials which by themselves are not very **harmful** could be **toxic** if they are inhaled in the form of **nanoparticles**. The **effects** of inhaled **nanoparticles** in the body may include lung inflammation and heart problems.

Title: Add-On Certificate Program on “Artificial Intelligence for Image Processing & Applications”

Objectives: How to Implement Artificial Intelligence for Solving Image Processing Tasks

Date: 15th March to 19th March 2021

Time: 9:00 AM to 5:00 pm

Location: The Oxford College of Engineering

Organized by: The Oxford College of Engineering

Report on Training 2020-21

Department of Corporate Relations gives high priority to the importance of training and mentoring. Best and in-demand training is offered to the students at TOCE. Along with trainings, students are encouraged to enrol for Certification Programmes. Various placement preparation activities are carried out throughout the year. Every student of TOCE is given equal and ample opportunities for Internship and Final Placement. Campus placement is organized at college level throughout the year so that maximum number of students get placed. Training and Placement Cell also guides the students for higher studies. It is as a result of our unique training methodology, we are always been preferred from premier corporates to acquire fresh talent.

FACE is one of India's largest skill development companies, catering to students pursuing higher education in colleges/universities as well as entry-level recruits in organisations across industry sectors.

Names of the Trainers

1. Sarumathi
2. Rupesh
3. Sudhanshu
4. Jeswin Jose
5. Ragul
6. Visakhan
7. Sahu
8. Aashish
9. Roshin

Topics of Training

- Number system
- Time and work
- Percentages, Simple interest and Compound interest
- Profit and loss, Partnerships and averages
- Permutation, Combination and Probability
- Time, Speed and Distance
- Ratio and Proportion
- Logarithms, Progressions, Geometry and Quadratic equations.
- Algebraic Expressions
- Surds, Indices and Simplification
- Set Theory
- Functions

2020-2021

SUMMARY REPORT

Sl. No.	Title	Duration	Venue	Faculty I/c
1.	Aptitude training by FACE	30 days	Online through MS teams	The Oxford College of Engineering

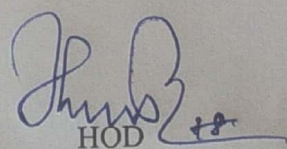

Summary Report:

1. Aptitude training by FACE:

A 30 days of add on course has been conducted between 20.10.2020 to 23.11.2020 successfully under the Guidance of Mr. Sarumathi, Mr. Rupesh, Mr. Sudhanshu, MR Jeswin Jose. Total number of Students enrolled for the course is 70 No's. The course is offered to Final Year students.

The course was conducted for UG Students on The program is written on a computer e. Supervisory Control and Data Aptitude is a control system architecture that uses computers, networked data communications and graphical user interfaces for high-level process supervisory management.

Coordinator

HOD
Professor & Head EEE
The Oxford College of Engg
Bommanahalli, Hosur Road
Bangalore-560 068

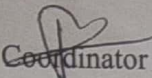

The aims of the course are:

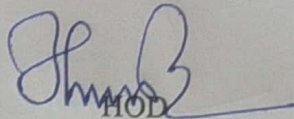

Intended to serve as an introduction to the number system, Time speed and Distance.

To get started as simple as possible.

To help students get started quickly and become productive in a short time.

Most useful and easily accessible features of Aptitude are included in course work to make students productive and develop confidence.

ACADEMIC YEAR 2020-2021

TITLE: Aptitude training by FACE

VENUE: Online through MS teams.

FACULTY: Mr. Sarumathi, Mr. Rupesh, Mr. Sudhanshu, MR Jeswin Jose

Duration:30 days(60hours)

SYLLABUS

THEORY:

Unit – 1: To become familiar with these Aptitude problems is the use of control devices such as Number system, percentages, simple interest, and compound interest to control industrial processes and machinery by replacing as much as possible labor intervention and dangerous assembly operations with automated ones. In industrial control a wide number of process variables such as temperature, flow, pressure, distance, and liquid levels can be sensed simultaneously(6 Hours).

Unit – 2: Algebraic Expressions is a digital computer interface used for the automation of various electro-mechanical processes in industries. The program is written on a computer and is downloaded to the PLC via cable. Supervisory Control And Data Acquisition surds, Indices and simplifications is a control system architecture that uses computers, networked data communications and graphical user interfaces for high-level process supervisory management., (6 Hours)

PRACTICAL SYLLABUS

Unit – 1: To become familiar with this Aptitude problems is the use of control devices such as Number system, percentages, simple interest, and compound interest to control industrial processes and machinery by replacing as much as possible labor intervention and dangerous assembly operations with automated ones. In industrial control a wide number of process variables such as temperature, flow, pressure, distance, and liquid levels can be sensed simultaneously(3 Hours).

Unit – 2: Algebraic Expressions is a digital computer interface used for the automation of various electro-mechanical processes in industries. The program is written on a computer and is downloaded to the PLC via cable. Supervisory Control And Data Acquisition surds, Indices and simplifications is a control system architecture that uses computers, networked data communications and graphical user interfaces for high-level process supervisory management. (3 Hours)

COURSE OUTCOMES: At the end of the course student will be able to:

- gets familiar with aims to provide good opportunity for the industry, and
- students to gain basic knowledge about industrial automation applications using PLC and SCADA With the speed of changing technology.
- today it is easy to lose sight or knowledge of the basic theory or operation of programmable logic.

- Interpersonal Skill

Participants (All the pre final year Students 2021 passing out students)

The training was conducted by Face in four batches and the batches were combining 3 departments in a batch

Batch 1

Master of Computer Application
Information Science and Engineering
Electronic and Electrical Engineering

Batch 2

Master of Business Administration
Mechanical Engineering
B.Architecture

Batch 3

Mechatronics Engineering
Civil Engineering
Automobile Engineering

Batch 4

Computer Science and engineering
Biotechnology Engineering
Electronics and communication Engineering

Schedule of Training

The Training was planned from mid of sept-2020 and the classes started from 20th October 2020 to 23rd November 2020. 2 hours per day per batch.

Question

The angle of elevation of the top of the light house from a boat moving away from the port is 60° . After travelling a distance of 60 m in the same direction, the angle of elevation is found to be 45° . What is the height of the light house?

- A) $30 + 30\sqrt{3}$ m
- B) $60 + 30\sqrt{3}$ m
- C) $90 + 30\sqrt{3}$ m
- D) 120 m

$(H_1) + (H_2) + (H_3) = 3 \text{ ways}$
 $\frac{3!}{1!1!1!} = 6 \text{ ways}$
 $(H_1) + (H_2) = 2 \text{ ways}$
 $\frac{2!}{1!1!} = 2 \text{ ways}$
 $(H_1) + (H_2) + (H_3) \times (H_1) + (H_2) = 6 \text{ ways}$

The angle of elevation of the top of the light house from a boat moving away from the port is 60° . After travelling a distance of 60 m in the same direction, the angle of elevation is found to be 45° . What is the height of the light house?

$AB = \frac{h}{\tan 60^\circ} = \frac{h}{\sqrt{3}}$
 $AC = \frac{h}{\tan 45^\circ} = h$
 $BC = 60 + n$
 $h - \frac{h}{\sqrt{3}} = 60 + n$
 $h(1 - \frac{1}{\sqrt{3}}) = 60 + n$
 $h = \frac{60 + n}{1 - \frac{1}{\sqrt{3}}}$

Academic Year : 2020-21

REPORT

Title: Technical Training on Soft skills and Training

Objectives: To Improve communication and technical skills

Date: 05/03/2021 to 09/03/2021

Location: Department of Management Studies, The Oxford College of Engineering

Organized by : FACE Institutions, Bangalore

Audience: IV Sem students of MBA

Speaker: FACE Institutions

Method Adopted: Theory session along with hands on sessions

Materials used: Project Management Tools

Description: Soft Skill training is working on personal attributes, communication abilities, personality traits, etc. which are important socially and professionally. These skills help you with a lot of things in the workplace. Soft skills play an important role in the success and growth of a person

Outcomes: Students were improved their communication skills and they have successfully completed the task
